2.1

SUMMARY OF UBER'S RESPONSE

The Court nailed it. Waymo's Offer of Proof confirms that the Jacobs allegations have turned out "to be a nothing." (Dkt. 2309, 11/28/17 Hr'g Tr. at 147:21-22.) Waymo took 17 depositions, and Uber produced thousands of documents pertaining to the allegations. The bottom line, to answer the Court's question, is that there is no "truthful information in the Jacobs materials" relevant to *this* case that was not already known to Waymo. (Dkt. 2447.) Waymo has known about the use of ephemeral communications platforms since at least June 2017. And there is no evidence that anyone at Uber (or Ottomotto, for that matter) working on autonomous vehicles used non-attributable devices—the use of those devices was limited to SSG and MA. Most importantly, Mr. Jacobs and his lawyer have both admitted that they have no evidence that Uber ever misappropriated trade secrets from Waymo, Google, or anyone else.

For these reasons, the Jacobs allegations have no place in this trial. This Court has already excluded from trial a number of extraneous "Uber is bad" issues:

We're not going to tell the jury that Uber is plagued with all of these problems that it has from sexual harassment to Greyball, and all of those other bad acts, unless Uber opens the door by saying that it's a good corporate citizen.

(Dkt. 775, 6/29 Hr'g Tr. at 4:8-22; *see also* Dkt. 1885 at 4 (order excluding evidence of Benchmark's suit against Uber's former CEO, except for impeachment purposes).) The Jacobs allegations fall into the same classic Rule 403 bucket: largely irrelevant, with any marginal relevance substantially outweighed by the danger of unfair prejudice, confusing the issues, and wasting valuable jury time. This is especially true here since the lawyer who wrote the demand letter admitted that the reference to stealing Waymo secrets was "an error in communication" with his client. (Ex. 28 at CFL000300.)¹ And Mr. Jacobs testified in deposition (consistent with his testimony in Court) that with respect to the issues this Court was interested in, there is no "truthful information" for the jury:

Defendants Uber and Ottomotto's Response to Waymo's Offer of Proof Case No. 3:17-cv-00939-WHA sf-3847021

¹ All citations to "Ex." are to the Declaration of Esther Kim Chang in Support of Defendants Uber Technologies, Inc. and Ottomotto LLC's Response to Waymo's Offer of Proof, filed herewith.

	i
1	Q: Do you know whether or not anybody in the autonomous vehicle group anywhere at Uber ever used a non-attributable
2	device?
3	A: No.
4	***
5 6	Q: Other than knowing that it might involve LiDAR, do you have any idea what the trade secrets are that were allegedly stolen?A: No.
7 8 9	Q: Have you ever seen any of the 14,000 documents that Anthony Levandowski allegedly took from Waymo? A: I mean, I don't know what the documents are, but not to my knowledge.
10	Q: Did you ever have any conversation with Mr. Levandowski about the alleged theft of trade secrets from Google or Waymo? A: Nope.
11 12	Q: Do you know whether any documents from Google or Waymo ever made it to Uber? A: No.
13	
14	(Ex. 9 (Jacobs Dep. at 178:1-16, 179:23-180:13 (emphasis added)).)
15	In Waymo's Offer of Proof, the only supposed "truthful information" Waymo cites is the
16	limited surveillance of Waymo vehicles on public roads and research on Waymo from public
17	sources, both of which are legal and, more importantly, irrelevant to whether Uber
18	misappropriated the eight alleged trade secrets. If Waymo's technology can be copied (and the
19	trade secrets ascertained) merely from observing Waymo's vehicles on public roads, then, by
20	definition, they cannot be trade secrets. Waymo cannot have it both ways. Either the surveillance
21	is irrelevant to the issues in this case, or Waymo's alleged trade secrets are not trade secrets
22	because they are readily ascertainable. Waymo's suggestion that a company would only observe
23	a competitor's vehicles if the competition was using the same (copied) technology is
24	outlandish. Many companies monitor their competition. In fact, Waymo
25	
26	With respect to ephemeral communications—as Uber noted during the evidentiary hearing
27	in November—Waymo knew as early as June 2017 that Uber used ephemeral communications
28	(Dkt. 2309. 11/28/17 Hr'g Tr. at 155:22-156:7: Ex. 19 (Ron 6/19/17 Dep. at 206:10-15. 206:23-

207:8); González Decl. ¶ 8, Ex. B), but Waymo chose not to make it an issue in this litigation. And now we know why: In addition to developing and using multiple ephemeral messaging systems, for a decade, Google has been deleting *all* of its employees' chat messages on Google Hangouts, unless the user takes affirmative steps to save them. (Ex. 10 (Johnston Dep. at 15:9-17, 28:12-25).) Waymo has followed this policy since its inception. (*Id.* at 75:3-7.)

The 37-page demand letter from Mr. Jacobs's attorney ("Jacobs demand letter," Dkt. 2307-2) also alleges that Uber improperly used attorney-client privilege designations based on supposed training by Craig Clark, a former Uber in-house lawyer. There is no admissible and relevant "truthful information" here either. Mr. Clark's testimony shows otherwise. (Ex. 2 (Clark Dep. at 215:11-228:17; 199:2-21).) Mr. Clark did not provide training to the autonomous vehicle group (*id.* at 46:23-25), and there is no evidence that Uber improperly labeled documents as privileged to shield them from discovery in connection with this litigation. Uber's outside counsel reviewed documents for privilege and made independent determinations as to whether a document should be produced. (Ex. 6 (Haimovici 30(b)(6) Dep. at 25:3-10, 36:23-37:4).) Uber's production demonstrates the independence of that review; documents were produced even if they contained a privilege legend if they were deemed not privileged. (*E.g.*, Exs. 65-69.)

While the Special Master determined that the Jacobs demand letter was responsive to two (out of 344) document requests (Dkt. 2396), Waymo has not been prejudiced. It received substantial discovery pertaining to the Jacobs allegations, discovery which has now confirmed that there was nothing to hide. The only revelation after a month of discovery is that a lawyer seeking money wrote a demand letter making false assertions relating to Waymo. Even if the Jacobs demand letter had been produced months ago, the result would have been no different. The Jacobs demand letter would have been excluded as hearsay and on relevance and 403 grounds because, at least with respect to the issues our jury is to consider, there is no "there" there.

Finally, this Court asked the parties to comment on the admissibility of the Jacobs demand letter and related documents. Waymo's response confirms that the Jacobs demand letter should not come into evidence. Remarkably, Waymo contends that the Jacobs demand letter is

admissible as an "adoptive admission" or pursuant to the residual exception of Rule 807. (*See* Appendix A at Ex. 2.) A second year law student would obliterate this argument. Uber has not done anything that "manifests an adoption or belief" in the truth of the statements in the Jacobs demand letter, and the letter has no "guarantees of truthworthiness" as required by Rule 807. Waymo has made similarly weak arguments in connection with the resignation email, a declaration from Mr. Jacobs's lawyer, and other documents. We address them in this brief and in response to Waymo's Appendix A and B.

I. WAYMO'S OFFER OF PROOF REGARDING PRACTICAL IMPLEMENTATION FALLS SHORT

2.1

Waymo carries the burden of proving both admissibility and foundation for every document and topic area. Importantly, Waymo failed to comply with this Court's order to "specifically explain the practical details of how it will implement its offer of proof." (Dkt. 2447 (emphasis added).) Throughout Appendices A and B to its Offer of Proof, Waymo sets forth nothing more than a mere list of potential hearsay exceptions without any support or explanation why those exceptions apply. Providing a mere list of evidentiary rules does not satisfy the Court's requirement to explain with specificity how an exhibit overcomes hearsay objections. Waymo's failure to comply with the Court's order improperly places the burden on Uber to explain the inapplicability of an exception without notice of how Waymo intends to satisfy its evidentiary burden. See PixArt Imaging, Inc. v. Avago Tech. Gen. IP (Singapore) Pte. Ltd., 2011 WL 5417090, at *9 (N.D. Cal. Oct. 27, 2011) ("A party seeking to admit a hearsay statement on the grounds that it falls into one of these exceptions bears the burden of proving that the exception is applicable by a preponderance of the evidence").

For several documents, Waymo cites to the residual exception of Fed. R. Evid. 807. To be admissible under Rule 807, a hearsay statement must satisfy several requirements: (1) have "equivalent circumstantial guarantees of trustworthiness"; (2) be "offered as evidence of a material fact"; (3) be "more probative on the point for which it is offered than any other evidence that the proponent can obtain through reasonable efforts"; and (4) "admitting it will best serve the purposes of these rules and the interests of justice." Fed. R. Evid. 807(a). Waymo makes no

attempt to satisfy its burden on these requirements. As we note in our responses to Appendix A and B (Uber's responses attached hereto as Appendix A and Appendix B), the exhibits Waymo intends to use the residual exception for do not meet these requirements and the exception does not apply.

Waymo claims that the Jacobs resignation email, the Jacobs demand letter, and even a declaration from Mr. Jacobs's lawyer are all admissible as "adoptive admission[s]." (App. A at 1, 2, 55.) It is difficult to fathom this argument, but in any case, Waymo offers no suggestion of who supposedly manifested an "adoption or belief" regarding the truth of the many statements in these documents. They are all blatant hearsay and are not admissible.

II. NO MATERIAL EVIDENCE WAS CONCEALED BECAUSE THE JACOBS ALLEGATIONS ARE UNTRUE OR IRRELEVANT

A. Mr. Jacobs Admits He Has No Knowledge of Any Theft of Trade Secrets by Uber

The situation here is a textbook illustration of why lawyer demand letters are not admissible in jury trials. *See Aniplex, Inc. v. Upper Deck Co.*, No. 2:08-CV-00442-HDM, 2011 WL 3889566, at *2 (D. Nev. Sept. 2, 2011) ("Demand letters constitute inadmissible hearsay."). A lawyer can say virtually anything when making a demand for money. There are no ramifications for saying something untrue. It is quite another thing altogether to back up those assertions under oath in front of a judge. Mr. Jacobs's testimony before this Court could not be clearer. The headline-creating assertion in the Jacobs demand letter that Mr. Jacobs was aware that Uber had used the Marketplace Analytics ("MA") team to "steal trade secrets at least from Waymo" (OOP Ex. 2, Jacobs demand letter at 12) turns out to be false. Mr. Jacobs emphatically and repeatedly rejected this allegation:

Q: Do you stand by that statement?

A: No.

Q: So your lawyer got it wrong?

A: I don't stand by that statement.

* * *

Q: What were you aware of with respect to Uber's use of the MA team to steal trade secrets from Waymo? A: Nothing.

* * * 1 Q: What were you aware of with respect to the MA team and its 2 interaction with the Waymo litigation? 3 A: Nothing. (Dkt. 2309, 11/28/17 Hr'g Tr. at 57:3-17, 58:23-25.) 4 Even when Waymo's counsel tried desperately to squeeze something—even something 5 inadmissible—from this witness, Mr. Jacobs remained firm and unwavering in testifying that he 6 had no knowledge of any trade secret theft at all: 7 8 O: Were you aware **with hearsay** or information that the MA team tried to obtain trade secrets from anybody, let's say, first in the United States? 9 A: No. **Absolutely no.** No firsthand or secondhand, no surmising 10 about work, the MA team against firms in the U.S., and certainly 11 not Waymo. (Dkt. 2309, 11/28/17 Hr'g Tr. at 61:20-25 (emphasis added.) This testimony confirms that the 12 assertion in the Jacobs demand letter most relevant to the issues in this case turns out to have been 13 a complete fabrication. 14 Other allegations in the Jacobs demand letter have similarly been debunked. (See, e.g., 15 Ex. 2 (Clark Dep. at 290:18-25 ("Q: Are you aware of Uber ever remotely accessing confidential 16 corporate communications and data from Waymo? ... A: No.")); Ex. 27 (Yoo 12/14/17 Dep. at 17 209:13-25 (unaware of Uber allegedly hacking a competitor's private information)); id. at 210:2-9 18 (unaware of Uber allegedly recording conversations or tapping phones)); id. 218:16-21 (unaware 19 of anyone in ThreatOps allegedly advising employees to abuse privilege to avoid discovery); id. 20 at 222:22-25 (unaware of anyone within Uber allegedly using ephemeral communications about 2.1 Waymo).) 22 Notably, Waymo chose not to take the deposition of Mr. Jacobs's lawyer, likely because 23 Waymo knew that he too would admit that the relevant allegations were false. (Ex. 28, 24 CFL000297 at CFL000300.) Instead, Waymo obtained a declaration from that lawyer regarding 25 how many hours his firm worked on this matter. (See Dkt. 2470-17.) That declaration is hearsay 26 and should not be considered. Waymo's assertion that it is an "adoptive admission" (Appendix A 27

at 55) is ridiculous.

B. The Use of Non-Attributable Devices Has No Bearing on Issues in This Case

1. No One Working on Autonomous Vehicles at Uber Used Non-Attributable Devices, and There Is No Evidence Such Devices Were Used to Obtain or Hide Waymo Confidential Information

There is no "truthful information" that anyone working on autonomous vehicles at Uber (or Ottomotto, for that matter) ever used non-attributable devices. Tellingly, Waymo identifies no such evidence. Mr. Jacobs so testified at the November 2017 hearing:

Q. Do you have any information of anyone outside of SSG or M.A. using those devices?
A. No.

(Dkt. 2309, 11/28/17 Hr'g Tr at 99:3-5; see also id. at 51:3-7, 77:24-78:1.) He further specifically testified that he had no knowledge of non-attributable devices "being used with regard to the autonomous technology groups." (Id. at 77:24-78:1; see also Ex. 9 (Jacobs Dep. at 178:1-5).) As the Court suspected (Dkt. 2447 (Order Re Forthcoming Offer of Proof and Response Thereto)), extensive discovery has confirmed that the use of non-attributable devices (also referred to as mis-attributable devices or research laptops) was "confined to SSG and MA," and not used by ATG. (Declaration of Kevin Faulkner in Support of Defendants' Response to Waymo's Offer of Proof ("Faulkner Decl.") ¶ 3; Ex. 6 (Haimovici 30(b)(6) Dep. at 20:20-24, 22:6-11, 120:2-9); Ex. 22 (Russo Dep. at 141:5-24); Ex. 12 (Maher Dep. at 257:17-25); Ex. 17 (Nocon Dep. at 137:15-24); Ex. 27 (Yoo 12/14/17 Dep. at 226:14-227:4); Ex. 20 (Ron 30(b)(6) 12/12/17 Dep. at 406:25-407:5); Ex. 26 (Sullivan Dep. at 305:1-7); Ex. 8 (Henley 30(b)(6) Dep. at 141:4-15); Ex. 2 (Clark Dep. at 356:3-357:1).) Further, contrary to the hearsay allegations in the Jacobs demand letter (Dkt. 2307-2 at 9), the individuals referenced in the Jacobs demand letter as being allegedly involved confirmed that they never provided training to ATG regarding the use of non-attributable devices. (Ex. 5 (Gicinto Dep. at 87:17-24); Dkt. 2309, 11/28/2017 Tr. at 138:9-21 (Russo); Ex. 17 (Nocon Dep. at 113:10-12).)

Waymo admits that it "did not uncover evidence that other departments utilized third party vendors to acquire devices paid for by Uber for the express purpose of ensuring those devices could not be traced back to Uber." (Dkt. 2466-3, Plaintiff Waymo's Offer of Proof Regarding Defendants' Discovery Misconduct ("OOP"), at 19.) Indeed, only a handful of individuals— all

from the SSG or MA groups—are known to use or have used non-attributable devices.² (Dkt. 2470-8; Ex. 60 (1/16/2018 list of non-attributable devices).)

Moreover, witnesses confirmed that to the extent non-attributable devices were used within ThreatOps, Waymo or Google confidential information or trade secrets were not accessed using these devices. (Ex. 5 (Gicinto Dep. at 78:5-20, 79:7-18, 103:16-104:18, 334:18-335:4); Dkt. 2310, 11/29/2017 Hr'g Tr. at 146:17-148:3.)

In addition, Stroz Friedberg searched all the non-attributable devices and anonymous servers and found no non-public Google or Waymo information. (Faulkner Decl. ¶¶ 4-5.)

Finding no evidence that anyone besides SSG and MA group members used non-attributable devices or that their use had anything to do with collecting confidential Waymo information, Waymo resorts to arguing that Levandowski's use of personal laptops for Uber work amounts to use of non-attributable devices to acquire Waymo confidential information. The Jacobs allegations have nothing to do with Levandowski's personal laptops. The non-attributable devices at issue were purchased by or for Uber; they were not personal equipment. (Ex. 22 (Russo Dep. at 109:2-24); Ex. 12 (Maher Dep. at 248:17-20; 250:1-4; 252:2-21).)

Further, Waymo has known about Levandowski's use of personal laptop computers since at least June 5, 2017, when Uber stated in an interrogatory response that Levandowski had used a personal laptop to access the Uber network. (Ex. 54, Uber's Responses to First Set of Expedited Interrogatories (No. 3).) Uber's records showed that Levandowski had used only one personal laptop "to access Uber's networks," and thus only one personal laptop was identified in Uber's interrogatory response. Unsatisfied, Waymo moved to compel a further response (Dkt. 681-3 at

² Waymo's complaint that Uber "unilaterally limited" its search and production of documents regarding non-attributable devices in response to the Court's order at the November 28 hearing is not well-taken. (*See* OOP at 19 n.15.) As a practical matter, it was not possible for Uber to execute a search of 15,000+ personnel in just six days. On November 29, Waymo wrote "[w]e expect that . . . [Uber's] searches will include everyone in the SSG and MA groups (including their predecessor groups), as well as other appropriate custodians." (Ex. 52 (11/29/17 Andrea Roberts email).) In an effort to be transparent, so that any problems could be addressed at the December 4 hearing, Uber met and conferred with Waymo twice on November 30, 2017, about the proposed scope of Uber's search. The parties agreed that this was where Uber should start, and Waymo reserved its right to seek more. Waymo did not raise the issue at the December 4 hearing. Uber produced 955 documents on December 4.

2.1

5-6), and Uber, in opposing the motion, provided a declaration stating that no other personal devices belonging to Levandowski—other than what was identified in response to the interrogatory—had accessed Uber's servers (Dkt. 749-8, (Faulkner Decl. ¶¶ 3-8).) Judge Corley found Uber's response sufficient and denied Waymo's motion. (Dkt. 881 at 2.) On Fifth Amendment grounds, Levandowski refused to turn over any personal laptops to Uber for searching, but agreed to allow his personal counsel at Goodwin Proctor to run searches on those machines and provide results to Uber. (Dkt. 2018-3, ¶ 2.) Uber provided the filenames, hash values, and the parties' search terms for the 14,000 files to Goodwin. Around June 19, 2017, Uber produced responsive documents from the search results to Waymo. (*Id.*; Dkt. 2020 ¶ 5.) Uber did not conceal any facts related to Levandowski's laptops, as Waymo alleges. (OOP at 31.) Waymo's attempts to manufacture a connection between this previously raised and already resolved issue should fail.

2. The SSG and MA Groups Used Non-Attributable Devices for Legitimate Purposes

To the extent that non-attributable devices were used at Uber, they were used for legitimate purposes. This Court heard directly from some of the SSG and MA employees who used those devices. Uber employees face violent opposition in many parts of the world. Certain Uber employees are tasked with trying to identify violent groups and to prevent such acts. When engaged in such online research, the last thing these employees should face is for their real names and employer to be revealed to their potential assailants. Internet websites track information, such as the IP addresses of computers that are accessing the site. Accordingly, some Uber employees used non-attributable devices when investigating security threats in order to avoid detection that would compromise their safety or those of others. (*See* Dkt. 2310, 11/29/2017 Hr'g Tr. at 114:25-115:7, 125:5-126:10 (Henley); Ex. 6 (Haimovici 30(b)(6) Dep. at 19:7-22); Ex. 5 (Gicinto Dep. at 89:1-11, 89:20-25, 94:1-22); Ex. 22 (Russo Dep. at 109:13-20); Ex. 7 (Henley 30(b)(6) Dep. at 63:3-65:24, 66:3-7, 67:14-18).) Mr. Jacobs similarly testified as to the limited use of these devices by SSG and MA. (Dkt. 2309, 11/28/2017 Hr'g Tr. at 50:1-21.) Although non-attributable devices were also used to conduct research into Uber's competitors to learn about

2.1

the competition, that research involved only *public* information. (Ex. 5 (Gicinto Dep. at 103:20-104:2, 78:5-20, 79:7-18); Dkt. 2310, 11/29/2017 Hr'g Tr. at 125:5-126:10.)

SSG and MA witnesses confirmed that non-attributable devices were not used for the purpose of evading discovery. (Ex. 26 (Sullivan Dep. at 305:1-7 ("Do you know whether anyone at Uber was ever instructed to use nonattributable hardware or software to prevent documents from being subject to legal discovery? . . . A. I have never heard of that happening."); *id.* at 301:25-302:8); Ex. 2 (Clark Dep. at 259:25-260:6 ("Q. Are you aware of Uber storing data on non-attributable devices to avoid detection, including in connection with legal discovery? . . . The witness: No."); Ex. 22 (Russo Dep. at 132:4-20 ("A. If you're asking me, did the misattributable devices exist to avoid discovery, then the answer is no. If I understand the question, was this – were these used to avoid legal discovery, then the answer is no.")); Ex. 7 (Henley Dep. at 72:24-73:11); Ex. 12 (Maher Dep. at 240:14-241:7); Ex. 11 (Kalanick 12/14/17 Dep. at 641:21-642:3).)

Waymo argues that the ThreatOps team's alleged refusal to implement *Mr. Jacobs's* suggestion for a centralized intelligence database supports its contention that Uber engaged in "efforts to conceal documents from discovery." (OOP at 19.) Waymo ignores the overwhelming evidence to the contrary. In particular, witnesses testified that the proposal was made by the entire ThreatOps team, not Mr. Jacobs alone (Ex. 5 (Gicinto Dep. at 191:22-192:10)); the team, including Mr. Jacobs's manager, supported the proposal (Ex. 7 (Henley Dep. at 73:25-74:8, 74:13-75:1); Ex. 5 (Gicinto Dep. at 192:11;193:7); Ex. 22 (Russo Dep. at 181:3-13); Ex. 2 (Clark Dep. at 249:13-24)); and the database was not implemented due to resource constraints—not to evade discovery (Ex. 5 (Gicinto Dep. at 192:17-193:1); Ex. 22 (Russo Dep. at 181:3-13); Ex. 7 (Henley Dep. at 73:12-24)).

In its brief, Waymo complains about its belated awareness of the security group's use of virtual machines, as described in a document entitled "Virtual Ops Capability Playbook." (OOP at 17, citing Ex. 217 (Dkt. 2467).) But Waymo fails to identify any evidence that the "Virtual Ops Capability Playbook" or Uber's virtual machines were used for any wrongdoing or for anything relating to the trade secrets at issue in this case. It cannot. As confirmed by testimony, virtual machines were used by the security group in conjunction with non-attributable devices to

1	protect the identity of persons investigating threats:				
2	Q. Was the purpose of this [Virtual Ops Capability Playbook] document solely to establish standards with respect to doing				
3	research in connection with individuals or groups who are threatening Uber?				
4	A. Yes. That's what a POI [person of interest] or a GOI [group of interest] is in our vernacular.				
5	Q. Okay. So a POI or GOI refers only to folks who are potential				
6 7	threats to Uber? A. Correct. The physical security team maintains a list of persons of				
8	interest and groups of interest because of some sort of a threatening posture—threats that they've actually made to the company,				
9	physical issues that have been observed on the platform, something to that effect—all over the world. And so this virtual ops capability				
10	playbook is in support of what would be, you know, misattributable research into those types of entities to protect Uber, to protect the identity of the researcher.				
11	(Ex. 5 (Gicinto Dep. at 305:20-306:15).)				
12	3. All Relevant Information on the SSG Secure Server Was Produced				
13	The security team stored data collected with non-attributable devices on a secure cloud				
14	server—at first, Dropbox and then NextCloud. (Ex. 22 (Russo Dep. at 125:22-25, 109:21-24);				
15	Ex. 5 (Gicinto Dep. at 71:13-17).) The purpose of the cloud server was to allow the security team				
16	"to collaborate on projects safely and securely" and to prevent the information from being				
17 hacked. Ex. 5 (Gicinto Dep. at 68-3-8, 68:13-23, 89:20-25); Ex. 22 (Russo Dep. at					
18 19	Access to these servers was limited to only a handful of people from SSG and ThreatOps:				
20	Q. How many different people used the system? A. Let's see. Seven or eight or so.				
21	Q. These were all folks who were in the SSG group? A. Or ThreatOPs.				
22	(Ex. 22 (Russo Dep. at 115:15-20); see also Ex. 5 (Gicinto Dep. at 70:8-10).) These servers				
23 24	included sensitive information, such as budgets and intelligence reports, but not Google or				
25	Waymo confidential information. (Ex. 5 (Gicinto Dep. at 74:12-17); Ex. 22 (Russo Dep.at				
26	118:20-119:1).)				
27	The contents of the security team's Dropbox accounts were moved to the NextCloud				
28	server, NextCloud was retired earlier in 2017, and Mr. Gicinto downloaded its contents before it				

1. Waymo Knew Prior to the Jacobs Demand Letter That Uber Employees Used Ephemeral Communications
C. Uber's Use of Ephemeral Communications Is Not New or Relevant, and Any Marginal Relevance Is Outweighed by the Danger of Confusing the Issues and Misleading the Jury
Waymo.
responsive documents relating to Google or Waymo have been produced, there is no prejudice to
existed on these secure cloud servers. (Ex. 5 (Gicinto Dep. at 334:18-335:4).) Because all
of the SSG group confirmed that no confidential information belonging to Google or Waymo
surprising that only a few documents regarding Google or Waymo exist. Moreover, the manager
107:15-19); Ex. 22 (Russo Dep. at 259:6-20, 311:2-9; Ex. 17 (Nocon Dep. at 56:8-11)), it is not
(Gicinto Dep. at 34:6-12, 46:10-18, 58:7-59:5, 78:2-20, 158:12-17); Ex. 7 (Henley Dep. at
security team testified that it conducted limited competitive intelligence into Waymo (Ex. 5
scarcity of documents produced from the secure servers. (OOP at 18-19.) But given that the
Waymo's Offer of Proof ("Rivera Decl."), filed herewith, ¶ 18.) Waymo complains about the
used by the security team. (Declaration of Sylvia Rivera in Support of Defendants' Response to
searched and produced responsive documents from the downloaded contents of that cloud server
was retired. (Ex. 5 (Gicinto Dep. at 75:21-76:4); Ex. 22 (Russo Dep. at 116:2-16).) Uber

This Court correctly observed that Waymo knew before seeing the Jacobs demand letter that Uber used ephemeral communications. (Dkt. 2447.) Lior Ron was deposed on June 19, 2017, and testified that he and Anthony Levandowski sometimes used the ephemeral application Telegram:

- Q: Did you ever use Telegram with Mr. Levandowski?
- A: I have used Telegram with Anthony later on --
- Q: When was that?
- A: --in some capacity.

- Q: Do are messages sent with Telegram saved?
 - A: I think you can either save them, or I think there's maybe an option to also not save them.
 - Q: Okay. And do you know which option Mr. Levandowski used?
 - A: I'm—I don't know for certain. I think **definitely there were** messages that were not saved. I think there was also messaged

28

that saved, but I'm not sure exactly how Telegram works in terms of saving or not.

* * *

Q: When's the last time you would have communicated with Mr. Levandowski using Telegram?

A: I don't remember exactly, but maybe a week or two ago.

(Ex. 19 (Ron 6/19/17 Dep. at 206:10-15, 206:23-207:8); González Decl. ¶ 8, Ex. B.) And on August 18, 2017, Eric Meyhofer also testified that he had communicated with Levandowski using Telegram. (Ex. 14 (Meyhofer Dep. at 38:10-18); González Decl. ¶ 8, Ex. C.)

There is no evidence that *any* relevant information was exchanged over Telegram or any other ephemeral messaging service. During the 17 supplemental depositions, no witness testified that any information in any way relevant to the subject matter of this case was exchanged using ephemeral messaging. Levandowski and Ron had Wickr accounts only for a brief period of time in 2017—after this lawsuit was filed. There is no indication that they used Wickr or any other ephemeral messaging service when negotiations relating to Uber's acquisition of Ottomotto took place, or that they ever used Wickr or any ephemeral messaging service to discuss LiDAR. (Ex. 33 (UBER00338417); Ex. 20 (Ron 30(b)(6) 12/12/17 Dep. at 342:21-25, 354:7-22, 378:5-379:9). Witnesses key to the issues in this case—for example, James Haslim, Gaetan Pennecot, Daniel Gruver, and Scott Boehmke—did not use Wickr or other ephemeral messaging services; (OOP Ex. 30 (ephemeral list provided to court); see also Ex. 6 (Haimovici 30(b)(6) Dep. at 20:20-21:7, 183:19-184:6 (Eric Meyhofer, the head of ATG, never used ephemeral communications to discuss anything related to this case, and made clear that any attempt to conceal information from discovery in litigation was unacceptable)); Ex. 13 (Majalya Dep. at 51:23-52:4); Ex. 23 (Spiegler Dep. at 43:23-44:17, 45:4-7, 45:21-25).) Further, Mr. Clark testified that he instructed employees not to use ephemeral communications if they were on legal hold. (Ex. 2 (Clark Dep. at 139:3-8); see also Ex. 27 (Yoo 12/14/17 Dep. at 412:7-11). Uber's legal hold explicitly instructs employees on litigation holds to "refrain from discussing anything that may relate to the potential claims . . . , including by using chat applications or any other instant messaging application." (Ex. 63 (Uber litigation hold.) There is no evidence of any loss

this was previously disclosed to Uber or to this Court in this litigation.

In one final ironic twist, Uber has learned that in a different legal proceeding involving Google, the opposing party sought an adverse inference jury instruction against Google based on its failure to preserve chat messages. There, Google argued that the default setting to not retain instant message chat records (making them ephemeral communications) comported with "accepted, widespread, and reasonable industry standards" and likened these ephemeral chat messages to "hallway conversation[s]." (Ex. 61, Function Media v. Google, No. 2007-CV-279, No. 483 at 147:8-18, 155:17-156:12 (E.D. Tex. Oct. 21, 2010) (post-trial motions hearing on spoliation).) Google further successfully argued that it had instructed employees to save chats related to that litigation, and the court in that case declined to give an adverse instruction. (See Ex. 42 Declaration of Theresa Beaumont (Google Discovery Counsel), ¶ 9; Ex. 62 Function Media, L.L.C. vs. Google, Inc. et al, No. 2007-CV-279, No. 416 (E.D. Tex. Jan. 26, 2010) (rejecting proposed adverse inference instruction).) In that litigation, Google sealed the briefing relating to this issue, so Google's views and arguments on adverse instructions for its destruction of chat messages remain sealed and obscured from the public and this Court until this recent round of discovery. (Function Media, Nos. 386 and 393 (Jan. 15, 2010 and Jan. 18, 2010) (sealed filings)).)

3. Uber, Like Waymo, Used Ephemeral Communication for Normal Business Purposes

Discovery has shown that Uber employees use ephemeral communications, like Wickr, because the ephemerality and end-to-end encryption make it a more secure means of communication. (Ex. 5 (Gicinto Dep. at 19:12-17); Ex. 8 (Henley 30(b)(6) Dep. at 73:7-10); Ex. 22 (Russo Dep. at 90:25-91:11, 95:8-18); Ex. 2 (Clark Dep. at 145:15-22).) In addition, using ephemeral communications is a best practice because it results in less data for the company to secure. (Ex. 26(Sullivan Dep. at 224:22-225:16).) This is not just a theoretical concern for Uber—Uber's data has been targeted multiple times by cyber hackers. (Ex. 8 (Henley 30(b)(6) Dep. at 125:4-6 (discontinuing ephemeral messaging was "making the company less secure and putting us more at risk")); *id.* at 126:1-3

); Ex. 2 (Clark Dep. at 132:9-17 (Uber's previous messaging system, HipChat, is "a terrible product," "[h]orribly insecure," and has "been hacked multiple times.").)

Waymo makes the unsupported argument that its use of ephemeral communications is for "normal business purposes," while Uber's use of similar ephemeral communications must be "for the purpose of thwarting discovery in ongoing of further litigation." (OOP at 21.) The overwhelming evidence is to the contrary. Witnesses have consistently testified that ephemeral communications were neither used to hide or obtain Google or Waymo trade secrets nor to evade discovery. (Dkt. 2310, 11/29/2017 Hr'g Tr. at 148:7-14 (Gicinto); Ex. 8 (Henley 30(b)(6) Dep. at 141:7-10); Ex. 2 (Clark Dep. at 139:15-18, 145:23-146:2); Ex. 22 (Russo Dep. at 95:8-12, 105:1-15).) And the allegation in the Jacobs demand letter that the ThreatOps group provided training to ATG on the use of ephemeral communications has been refuted. (Dkt. 2309, 11/28/17 Tr. at 138:9-21 (Russo); Ex. 22 (Russo Dep at 93:5-14, 141:17-24); Ex. 17 (Nocon Dep. at 113:6-9).) All that Waymo can say is that Uber's use of ephemeral communications "would have the effect of avoiding discovery in ongoing or anticipated litigation." (OOP at 21.) But that would be the case whenever any company uses ephemeral communications. Further, discovery has shown that when Uber employees are placed on litigation holds, they are explicitly instructed not to use ephemeral messaging applications in a manner that would have the effect of avoiding discovery in ongoing or anticipated litigation (and are specifically instructed not to use ephemeral communications to discuss the subject matter covered by a litigation hold). (Ex. 6 (Haimovici 30(b)(6) Dep. at 77:5-22, 85:19-25); Ex. 27 (Yoo 12/14/17 Dep. at 412:7-11); Ex. 2 (Clark Dep. at 139:3-8); Ex. 12 (Maher Dep. at 76:17-23); Ex. 22 (Russo Dep. at 101:22-102:5, 102:12-20).) Waymo cites no evidence that any Uber employee failed to comply with the litigation hold in this case.

Further, Uber's legal hold relating to ephemeral messaging is considerably more stringent than Waymo's, which is more permissive." (*Compare* Ex. 63 ("Please **refrain from discussing anything that may relate to the potential claims** described above, including by using chat applications or any other instant messaging application.") (Uber litigation hold); *with* Ex. 44,

Case 3:17-cv-00939-WHA Document 2500-3 Filed 01/19/18 Page 24 of 70

In addition to public surveillance of Waymo vehicles, Uber conducted open-source research on competitors, including Waymo. Ed Russo testified that when he was doing assessments on Google's AV program, he reviewed and summarized "articles and blog features" and provided an assessment based on online research. (Ex. 22 (Russo Dep. at 44:5-24).) Nick Gicinto also testified that his team would look through press articles to find any identifying features of Waymo's cars to make public surveillance efficient. (Ex. 5 (Gicinto Dep. at 104:3-18.) And Mat Henley testified that his team would look "for open source research into, you know, who were the senior engineers making up different aspects of different programs at different companies." (Ex. 7 (Henley Dep. at 126:12-22.)

Google

³ Waymo points to a recorded conversation where Mat Henley commented to another coworker about the merits of the Waymo litigation. This was speculation, and Mr. Henley testified that he had no evidence of any Google or Waymo confidential information or trade secrets at Uber. (Ex. 7 (Henley Dep. at 111:22-112:23).) It is also inadmissible. First, Mr. Henley's speculative comments were not on a matter within the scope of his employment, making Federal Rule of Evidence 801(d)(2)(C) inapplicable. Second, the comments plainly are not present sense impressions under Rule 803(3). Third, even if the video itself were a business record under Rule 803(6), that rule does not apply to the embedded hearsay comment Waymo emphasizes. Waymo cites no other hearsay exceptions for the video in its Appendix A, and does not argue that the video is relevant for a non-hearsay purpose. Finally, even if Waymo could overcome the rule against hearsay (which it cannot), Mr. Henley's speculative comments are inadmissible under Rule 402, because they are irrelevant speculation, and Rule 403, because the risk of prejudice to Uber vastly outweighs the non-existent probative value of Mr. Henley's uninformed speculation.

1	has no bearing on whether Uber misappropriated eight alleged trade secrets or on LiDAR				
2	development generally. If Waymo's alleged trade secrets are ascertainable from public sources,				
3	then they are not trade secrets. Waymo cannot have it both ways: Waymo cannot claim that				
4	public observation is evidence of trade secret misappropriation, and still claim trade secret status				
5	on information that is ascertainable from public observation.				
6	The written report of Uber's public surveillance of Waymo's vehicles shows no				
7	information relating to LiDAR development and testing. Witnesses confirmed that the public				
8	surveillance of Waymo's vehicles did not result in the acquisition of any Waymo confidential				
9	information or trade secrets. (Ex. 22 (Russo Dep. at 137:3-13); Ex. 5 (Gicinto Dep. at 120:14-				
10	121:12, 159:20-160:7); Ex. 21 (Ron 12/12/17 Dep. 435:16-436:7).) Waymo does not identify any				
11	evidence to the contrary. As evidenced by the documents, Uber tracks much of the same				
12	information of its competitors such as license plate number, number of				
13	occupants, and photos of the vehicle. (Compare OOP Exhibit 45 with Ex. 49, Stewart Ex. 2305.)				
14	Witnesses further testified they were unaware of anyone at Uber obtaining confidential				
15	information or trade secrets from a third party, including from Waymo or Google:				
16	Q. Are you aware of anyone in your group or outside of your group				
17	at Uber, including vendors, that engaged in unauthorized solicitation, receipt, use or replication of trade secret information or confidential information of a third party?				
18	A. No."				
19	(Ex. 5 (Gicinto Dep. at 131:16-22; see also id. at 78:2-20, 79:3-18, 80:5-81:1, 84:17-25).				
20	Q. Did you ever witness anyone at Uber obtain confidential				
21	information or trade secrets from a third party? A. No."				
22	(Ex. 22 (Russo Dep. at 135:10-13; see also id. at 69:25-70:5, 72:2-9, 137:3-13; 148:1-12).)				
23	Uber's former chief security officer likewise testified that he knew of no attempts to steal trade				
24	secrets from anyone:				
25	Q. Do you have personal knowledge whether the marketplace				
26	analytics team as a whole stole trade secrets or not?				
27	A. I would be shocked if they had engaged in something like that. My understanding was that their mission related exclusively to one				
28	type of work, which was the scraping, and that that work was				

27

28

a Comprehensive Collection Plan for Google's Confidential Information

Waymo points to a draft document entitled "A Collection Strategy: Autonomous

Vehicles: Mapping the Competitive Landscape" to argue that Uber executed a nefarious
intelligence collection plan against Waymo. (See OOP at 12-13.) Waymo ignores that this was a
draft document and that its author, Ed Russo, testified that the strategy outlined in the draft
document was never implemented. (Ex. 22 (Russo Dep. at 295:8-296:4, 313:15-314:8, 319:19-
23; see also Ex. 5 (Gicinto Dep. at 145:12-19, 151:21-25, 152:14-20, 165:11-16).) Mr. Russo
further testified that he created this document shortly after he started at Uber and it was a "purely
conceptual" document conveying one "philosophical approach to looking at the autonomous
vehicle competitive landscape." (Ex. 22 (Russo Dep. at 310:21-22); Ex. 5 (Gicinto Dep. at
144:22-145:4).) Other than the public surveillance of Waymo vehicles and related background
research discussed above, Uber did not implement any of the other collection objectives listed for
"Giraffe," i.e., Google. (Ex. 22 (Russo Dep. at 308:19-22 ("Q. So it looks like a lot of these
collection objectives for Google were never met. A. Correct.")).) For example, Uber did not
investigate what OEM Google was partnering with or what technology Google was outsourcing
(aside from the public knowledge that Velodyne is or was the supplier of LiDAR for all AV
companies, see Ex. 64 (https://www.eetimes.com/document.asp?doc_id=1330321) as an
example). (Ex. 22 (Russo Dep. at 304:14-25; Ex. 5 (Gicinto Dep. at 155:23-156:5).) As another
example, although the draft collection plan mentions meetings to further assess competitors'
claims regarding their progress, Russo confirmed such meetings never occurred. (Ex. 22 (Russo
Dep. at 313:18-314:3).)
Waymo also ignores that witnesses confirmed that there was no one in ThreatOps, which
includes SSG and the team formerly led by Mr. Jacobs, collecting any technical data about
Waymo. (Ex. 22 (Russo Dep. at 311:2-9); Ex. 5 (Gicinto Dep. at 159:20-160:7)) or speaking with
former employees of competitors to get information about how those competitors structure their
AV Program (Ex. 22 (Russo Dep. at 40:18-23, 43:16-20, 142:20-143:7); Ex. 5 (Gicinto Dep. at
158:12-17, 168:2-18).) Waymo ignores testimony that: "Vendor 1" in the draft collection plan
was a hypothetical entity; a "Vendor 1" was never retained; and there are no other document
discussing this hypothetical "Vendor 1." (Dkt. 2450 at 6; Ex. 5 (Gicinto Dep. at 172:19-173:24).)
In fact, Judge Corley denied Waymo's motion to compel additional documents on "Vendor 1"

because she was satisfied "that Uber is not withholding responsive documents." (Dkt. 2454.)

Left with nothing, Waymo mischaracterizes documents and ignores contrary testimony in arguing that SSG elicited confidential information and source code from competitors and supply chain members of competitors. For example, Waymo cites to a "CES 2017 – Priorities of Effort" document (OOP Ex. 23) as evidence that SSG attended the CES conference to collect confidential information, such as source code. (*See* OOP at 15 n. 10.) But Mr. Russo, who authored the document and attended CES 2017, testified that the document was simply a list of priorities regarding information of interest at CES 2017. (Ex. 22 (Russo Dep. at 252:14-21, 253:4-16); *see also* Ex. 5 (Gicinto Dep. at 319:15-320:2).) He testified that the plan was to pay attention to *public* statements at CES 2017 regarding these issues at various presentations:

Q: Was it -- was it your intention in collecting information at CES 2017, with respect to competitors' source code, simply to attend presentations that your competitors were giving to see if they mentioned anything about source code?

A. Just that simple.

(Ex. 22 (Russo Dep. at 256:6-12; *see also id.* at 255:3-10).) As Mr. Russo explained, at a "large-scale event" such as CES 2017, people want to showcase their success, so it did not seem improbable that someone would discuss information on the priorities list. (*Id.* at 253:17-254:3.) There was nothing nefarious about Mr. Russo's plan to listen to presentations at CES 2017 and keep an ear out for discussion of source code. (*Id.*; *see also* Ex. 5 (Gicinto Dep. at 321:1-25).) Moreover, witnesses confirmed that they were ultimately unable to learn anything about competitors' source code at CES 2017. (Ex. 22 (Russo Dep. at 254:17-23, 256:15-17); Ex. 5 (Gicinto Dep. at 322:21-323:2).)

Waymo also mischaracterizes Exhibit 24, a report regarding what Jung Sang Lidar, a Korean LiDAR company, openly shared with an SSG employee at CES 2017, as evidence that Uber elicited "non-public Google information" from vendors. (*See* OOP at 15 n. 10.) Setting aside that such alleged "non-public Google information" is not a trade secret, the information gleaned from Jung Sang Lidar is unremarkable: that Google X employees attended CES 2017 to seek potential LiDAR vendors; that the resolution of Google's LiDAR sensor was less than ideal;

and Google requested follow-up information on Jung Sang Lidar's sensor. (See Ex. 31,
UBER00330899.) These statements, which were made openly by a vendor at a large global trade
show, are not "non-public" or confidential trade secret information of any kind, let alone directed
to the eight alleged trade secrets here. Further, these conversations were initiated by Jung Sang
Lidar representatives while advertising its LiDAR sensors. (See id.) When questioned about this
report, witnesses testified that they believed Jung Sang Lidar made those statements to attract
customers and that they largely discounted them. (Ex. 22 (Russo Dep. at 265:3-17, 265:18-21);
Ex. 5 (Gicinto Dep. at 323:22-324:1, 324:20-325:5).)
Similarly, Waymo cites to a single sentence in a February 7, 2017 memorandum stating
that "[s]upply chain members are 'chatty' and are good sources of insight into a competitors'
plans, intentions, and capabilities" as evidence that Uber ATG directed the ThreatOps team to
elicit confidential information from supply chain members. (OOP at 16.) Waymo again ignores
repeated testimony that ThreatOps employees never spoke with any supply chain vendors to
acquire any information about Uber's competitors, including Waymo:
Q. Well, it doesn't say that here. It just says: "Supply chain members are chatty and are good sources of insight into a competitor's plans, intentions and capabilities." Right?
A. Well, if Mr. Russo is paraphrasing there, it's unclear specifically what Mr. Ron was referring to. But I can state that our team did not engage any supply chain members that I am aware of in order to gain insight into plans, intentions and capabilities.
Q. Okay. And did any of Uber's vendors do that, to your knowledge?
A. Not to my knowledge.
Q. Is there any reason for you to believe that there was a vendor engaged by Uber that spoke with supply chain vendors or suppliers to any autonomous vehicle competitor of Uber's?
A. Not to my knowledge. To my knowledge, SSG isn't even aware of who the supply chain members are related to Waymo.
Q. Did you ever make any effort to identify who the supply chain members to Waymo are?
A. Nope.
(Ex. 5 (Giginto Den. at 295:20-296:23): see also Ex. 22 (Russo Den. at 278:17-23, 280:14-23:

22

Waymo also claims that a presentation titled "Zoo Update" (OOP Ex. 18) is evidence of execution of the Collection Plan, because it included a slide titled "Baseline Research," which included a bullet on "source code." (OOP at 14.) Waymo again mischaracterizes the document and related testimony. Mr. Russo, who was the lead drafter of the document, testified that the "Baseline Research" slide was a result of some preliminary interviews with ATG personnel and indicated the aspects of a self-driving system that ATG considered most important. (Ex. 22) (Russo Dep. at 238:5-8, 242:24-243:10); Ex. 5 (Gicinto Dep. at 250:15-251:1, 254:13-24).) The information in the presentation was intended to provide "a sense of the lay of the land, as it were, regarding the various leaders in the autonomous vehicles field"—not a collection strategy. (Ex. 22 (Russo Dep. at 237:16-21).) Mr. Russo further explained that the phrase "[f]or 2017, SSG's priority effort will be Giraffe" in the presentation meant "[t]hat the bulk of our research efforts would be tracking Giraffe's success or efforts to improve its autonomous vehicle program." (Id. at 247:13-20).) At the time, Mr. Russo felt it would be important for Uber to track the success of Google's autonomous program "because Google was the leader in the field, and if Uber was going to succeed or be the one to win the race, it wanted to have an understanding of how Giraffe [Google] was proceeding or progressing." (*Id.* at 247:21-248:3.) Like Uber's other competitive intelligence activities, research into autonomous vehicles described in the presentation was a result of open-source research from *public* sources. (*Id.* at 240:1-4, 240:13-19, 241:1-4; Ex. 5 (Gicinto Dep. at 149:7-18, 161:24-162:18).) There is nothing nefarious about such activities, and those activities are not relevant to Uber's alleged misappropriation of the eight alleged trade secrets still in this case.

23

²⁵²⁶

²⁷²⁸

⁴ Waymo also cites Exhibit 22, a February 15, 2017 memorandum regarding a follow-up meeting on February 14, 2017 between SSG and ATG that Levandowski attended. This meeting was already listed on the LiDAR log produced by Uber. (OOP at 15; *see also* Ex. 56, September 5, 2017 Supplement to Non-Privileged Item 5 Log at No. 926.) There was no discussion in the memorandum of any Google or Waymo trade secrets or confidential information, or any direction from ATG to SSG to acquire Google or Waymo trade secret or confidential information.

2.1

4. Levandowski and Ron Did Not Lead an Effort to Use ThreatOps to Obtain Waymo Confidential Information

Waymo asserts again and again that the "competitive intelligence operation . . . was directed by Uber ATG managers (and Ottomotto co-founders) Anthony Levandowski and Lior Ron." (OOP at 1; *see also id.* at 7 (claiming ThreatOps gathered information "with the guidance of ATG directors Anthony Levandowski and Lior Ron"), 12, 14-15.) The evidence obtained in discovery flatly contradicts this assertion.

First, despite Waymo's suggestion that the operation came from within ATG, the evidence shows that in early 2017, the ThreatOps "team approached [Levandowski and Ron] offering to help with some market data. . . . [j]ust information on market players, competitors." (Ex. 21 (Ron 12/12/17 Dep. at 410:25-412:10).)

Second, Messrs. Levandowski and Ron met with ThreatOps personnel only a handful of times in early 2017—timing that has nothing to do with Waymo's actual misappropriation allegations in this case. (*Id.* at 542:23-544:18; 429:9-18.) The chronology does not support Waymo's representations to the Court.

Third, Waymo vastly overstates the so-called "guidance" Messrs. Levandowski and Ron provided to ThreatOps. Levandowski's discussion with ThreatOps related to collecting information in San Francisco. Levandowski was "skeptical" of the "usefulness" or "practicality" of information from ThreatOps. (*Id.* at 543:4-544:18.) Mr. Ron's communication with ThreatOps was similarly high-level, focusing on "geos [i.e., geographies] and the size of the fleets" and "examples of some of the sort of public driving of those cars in those cities." (*Id.* at 540:10-15, 417:25-418:25 (describing discussions with ThreatOps team).) There is nothing remarkable in the information that was discussed with ThreatOps, and more importantly, nothing relevant to the issues in this case.

Waymo makes the unsubstantiated leap from these limited ThreatOps meetings to a conclusion that Messrs. Levandowski and Ron were "directing" "Uber's intelligence group to obtain confidential information about Waymo and other autonomous vehicle competitors." (OOP at 15-16.) Waymo fails to identify, however, any confidential information Messrs. Levandowski

and Ron "directed" ThreatOps to obtain or a single piece of Waymo confidential information that ThreatOps did obtain as a result of any efforts. (*See* OOP at 15-16 & n.10 (attempting to ascribe suspicion to a ThreatOps document describing a chatty vendor who claimed Google was interested in its LiDAR technology, but who revealed no confidential information); OOP at 16 (describing surveillance of Waymo cars on public roads). Waymo's speculative theory finds no support in the actual evidence.

Waymo also complains about periodic "competitive intelligence" emails, yet admits that the emails merely "summarized publicly gathered information on various autonomous vehicle competitors" (OOP at 14), as corroborated by the testimony of Mr. Ron. (Ex. 21 (Ron 12/12/17 Dep. at 459:16-460:1.)) Review of the "competitive intelligence" emails confirms this conclusion; they contain no more than summaries of news clips from public sources, such as Reuters, Fortune, SF Chronicle, Autoblog, and TechCrunch. (Ex. 50 (Ron Dep. Ex. 9002 at UBER00329740).) Waymo circulates similar emails internally. (Ex. 40, WAYMO-UBER-00027031 (December 2016 email to the "chauffeur-industryinfo" alias regarding competitive intelligence on Uber).) Despite having no evidence to substantiate its claims, Waymo speculates that the distribution of public news articles regarding Waymo must have been nefarious given the timing of Uber's "pivot" from Spider to Fuji. (OOP at 14.) This Court should not credit such speculation as a substitute for the evidence that Waymo must set forth to prove its trade secret misappropriation claims.

III. UBER DID NOT ABUSE THE ATTORNEY-CLIENT PRIVILEGE, AND WAYMO WAS NOT DEPRIVED OF ANY DISCOVERABLE INFORMATION

Waymo's claim that Uber improperly "shrouded" documents with the attorney-client privilege to prevent them from being produced in this case is refuted by the record evidence. There is no evidence that anyone in Uber's self-driving group purposefully labeled documents attorney-client privileged to prevent discovery. Uber trains its employees in the proper use of privilege, including to correct any misunderstandings gleaned from prior employers such as Google. Most importantly, it is undisputed that Uber relied on the independent judgment of its outside counsel in this case to determine whether a document is privileged and should be

produced—irrespective of any label applied by an employee. As a result, Uber has produced and Waymo has received the information to which it was entitled, and Waymo has not been deprived of relevant information.

Waymo attempts to leverage the Jacobs allegations to relitigate issues that it previously brought before the Court. These disputes should not persuade the Court to admit evidence of Mr. Jacobs's unproven allegations.

A. There Is No Evidence that Uber's Autonomous Vehicle Group Improperly Labeled Documents as Privileged

The heart of Waymo's privilege argument is a training presentation prepared by Craig Clark, a former Uber in-house lawyer. (OOP at 22-23.) But Mr. Jacobs admitted that he has never been to Pittsburgh and thus has no admissible basis for knowing what training, if any, was provided to ATG employees. (Ex. 9 (Jacobs Dep. at 176:24-177:2, 193:2-6).) Further, Mr. Clark testified that he never led any training for Uber's self-driving car group; in fact, he has never even been to Pittsburgh, where the ATG training allegedly occurred. (Ex. 2 (Clark Dep. at 46:23-25, 203:14-17).) And the evidence is overwhelming that ATG employees and others outside of ATG did not intentionally mark documents privileged for any improper purpose. (*See* Ex. 22 (Russo Dep. at 141:5-142:7); Ex. 12 (Maher Dep. at 147:18-148:3); Ex. 2 (Clark Dep. at 202:2-6, 16-22); Ex. 17 (Nocon Dep. at 113:13-16; Ex. 13 (Majalya Dep. at 54:13-19; Ex. 23 (Spiegler Dep. at 53:15-54:4); Ex. 27 (Yoo 12/14/17 Dep. at 195:15-196:5, 386:3-7, 391:16-22, 392:7-21; Ex. 11 (Kalanick 12/14/17 Dep. at 541:15-25, 640:22-641:13); Ex. 6 (Haimovici 30(b)(6) Dep. at 28:15-29:12, 48:12-25, 181:19-183:1; Ex. 7 (Henley Dep. at 138:7-10); Ex. 21 (Ron 12/12/17 Dep. 465:1-10).)

Mr. Clark's presentation on its face instructs the audience on the proper use of the attorney-client privilege.⁵ As Mr. Clark testified, a goal of the training was to "disabuse[]

⁵ Waymo's claim that the version of Mr. Clark's presentation Jacobs claims to have seen was "lost or destroyed" is rank speculation. (OOP at 22.) Mr. Clark testified he never created or gave a version of the presentation that lacked the Uber logo, (Ex. 2 (Clark Dep. at 205:7-20)), and there is no evidence corroborating Jacobs's assertion that there was a version of the presentation that lacked Uber branding. (Ex. 6 (Haimovici 30(b)(6) Dep. at 142:12–143:16 (Jacobs is "just wrong" that any version of the presentation lacked Uber branding)).) Waymo also did not show

everybody of the notion of marking something privileged is going to somehow magically protect them." (Ex. 2 (Clark Dep. at 233:9-12).) Thus, when asked if he ever instructed employees to be over-inclusive in their privilege designations, Mr. Clark responded:

No. This is, I hope, demonstrating the exact opposite. It is meaningless to do so. Ultimately, an arbit[er] of what is privileged or not privileged is a judge. And the designation and the propriety of those designations are done by outside counsel, typically, who are doing productions.

(*Id.* at 222:21-223:7.) Mr. Clark walked Waymo's counsel through the presentation and made clear that he properly trained Uber employees on the privilege. (*Id.* at 213:25-235:12.)

Mr. Jacobs admitted that he has no knowledge that "anyone at Uber's autonomous group ever labeled a document as privileged when it was not" or that "anyone in the autonomous vehicle group at Uber ever purposely labeled the document as privileged in order to hide it from discovery." (Ex. 9 (Jacobs Dep. at 178:10-16, 179:1-5; *see also* Dkt. 2309, 11/28/17 Hr'g Tr. at 83:2-84:8 (Jacobs) (disavowing allegations regarding ATG training and refusing to "stand by" them).) Moreover, the three Uber employees who supposedly provided training to ATG are not lawyers, have never provided training to anyone in ATG regarding assertion of privilege, and emphatically denied these allegations. (Ex. 17 (Nocon Dep. at 113:13-16, 161:20-162:3, 164:15-165:2,166:7-168-24, 170:15-22, 178:1-179:22, 181:13-182:14, 208:2-6); Ex. 5 (Gicinto Dep. at 179:25-180:5); Ex. 22 (Russo Dep. at 141:5-142:7).)

B. Uber Trains Its Employees on the Proper Use of Privilege Labels

The evidence is also clear that Uber trains its employees, including specifically the employees at ATG, in the proper use of the attorney-client privilege. (Ex. 6 (Haimovici 30(b)(6) Dep. at 50:18-55:8 (new Uber employees receive a training on the attorney-client privilege, and they receive periodic training for different groups in the business as well); 20:20-21:11; 182:7-183:1 (ATG employees understood to use attorney-client privilege labels only when seeking legal advice from a lawyer)).) Part of the importance of that training is to encourage employees to lose

Jacobs during his deposition the three other versions of the presentation Uber located and produced after a diligent search. (Exs. 34-36 (UBER00340331, UBER00340360, UBER00340391).)

the bad habits they picked up from prior employers—including Google. As Ms. Padilla explained, Google employees came to Uber with a habit of adding a lawyer to an email chain and simply asking "any legal advice?" (Ex. 18 (Padilla 12/22/17 Dep. at 204:24-205:4).)

Waymo's assertion that certain Uber personnel had an "overbroad understanding" of the privilege (OOP at 23) is also refuted by the record. For example, Mr. Russo explained that "based on the training I had, I understood there to be two – two categories for labeling something attorney-client privilege. Right? When soliciting advice or guidance or if you're preparing a product that had been at the direction of legal, those were the times I would use attorney-client privilege." (Ex. 22 (Russo Dep. at 82:22-83:16); see also Ex. 17 (Nocon Dep. at 197:6-198:6, 182:9-14 (part of Mr. Clark's training was that it was improper to add someone from legal to an email for the purpose of claiming privilege)); Ex. 8 (Henley 30(b)(6) Dep. at 114:8-115:24 (witness understood that, when working on work product "specifically done at the direction of a lawyer," it was proper to tag it privileged)).) Particularly given Mr. Clark's training that the privilege label is a "tag," (Ex. 2 (Clark Dep. at 199:6-18 ("[A] label is a tag. . . . [w]hether something has a tag on it really facilitates review: Hey, heads up, document reviewers, this might be privileged.")), these witnesses' understanding of the use of the label is consistent with both Mr. Clark's training and the law. Moreover, when those who received his training mis-tagged a document as privileged, Mr. Clark took steps to correct it. (Ex. 37, UBER00355965; see also Ex. 2 (Clark Dep. at 371:23-375:22); Ex. 6 (Haimovici 30(b)(6) Dep. at 132:17-22, 141:9-19 (it would be "inconsistent with our training" to instruct an employee on the privilege improperly).) For example, when an SSG employee sent Mr. Clark a document and said "for your review, and legal advice," Mr. Clark responded:

[T]his really shows abuse of the ac priv statement like we talked about last week. Is thanking her really for my review and advice?

(Ex. 37 at UBER00355966.)

Mr. Clark then raised the issue with that employee's supervisor (i.e., Richard Jacobs) and conveyed that he was "disheartened by the fact that my legal priv training did not sink in." (*Id.* at

Outside Counsel Independently Assess Whether Each Document Is Privileged

Finally, Uber relies on its outside counsel to determine independently whether a document is privileged. (Ex. 6 (Haimovici 30(b)(6) Dep. at 24:20-25:2; 36:20-37:4).) Thus, Uber's most recent document production and its productions throughout this case have included documents marked privileged, including competitive intelligence documents. (Ex. 6 (Haimovici 30(b)(6) Dep. at 25:3-22, 36:24-37:10, 29:3-12, 33:18-34:16, 48:12-25); Ex. 27 (Yoo 12/14/17 Dep. at 195:16-196:5; Ex 2 (Clark Dep. at 199:6-18, 222:1-7); Ex. 18 (Padilla 12/22/17 Dep. at 206:4-207:25); see also e.g., Ex. 68 (UBER00285865); Ex. 29 (UBER00063696); Ex. 65 (UBER00218222) (documents produced in regular discovery).) In fact, every one of Waymo's examples was produced to Waymo without any motion to compel. (OOP at 24; Waymo Exs. 13, 15, 18, 21, 22, 24, 37, 38.) Importantly, there is nothing in these documents relevant to whether Uber misappropriated the eight trade secrets that remain at issue in this case. At Waymo too, employees mark documents privileged that are adjudged to be not privileged by outside counsel and then produced. (E.g., Ex. 38 (WAYMO-UBER-00006373); Ex. 39 (WAYMO-UBER-00009646); Ex. 41 (WAYMO-UBER00034071).)

D. There Is No Evidence That Uber Otherwise Misused Attorney-Client **Privilege Designations to Avoid Discovery**

Waymo also claims that Uber executives and employees in business units (in addition to ATG) "were trained to designate non-privileged materials with 'Attorney-Client Privilege' headers." (OOP at 42.) Not true. That Waymo does not cite to any deposition testimony in support of its position is telling. (Id.) The depositions Waymo took show why. As discussed above, Uber trains its employees on the proper use of privilege labels. For example, Ms. Yoo testified "the practice and policies at Uber were to make sure that teams were informed that simply putting 'Attorney-client privilege' on a document did not render it privileged. That privilege attaches when legal advice is sought from a lawyer. And our practice was that teams

⁶ Ironically, this email exchange is one that Mr. Jacobs exfiltrated before leaving Uber.

2.1

were taught that adding a lawyer to a thread and saying—adding Salle for privilege did not render that communication or that document privileged." (Ex. 27 (Yoo 12/14/17 Dep. at 195:16-25).)

Her statements are supported by many other Uber employees, including Uber's corporate representative on this topic. (*See* Ex. 13 (Majalya Dep. at 54:13-19); Ex. 23 (Spiegler Dep. at 53:15-54:4); Ex. 11 (Kalanick 12/14/17 Dep. at 541:15-25, 640:22-641:13); Ex. 6 (Haimovici 30(b)(6) Dep. at 28:14-29:12, 181:19-183:1); Ex. 18 (Padilla 12/22/17 Dep. at 206:4-207:25).)

Waymo also tries to ascribe blame because certain documents that were produced bear the label "Privileged and Confidential" or "Attorney Work Product." (OOP at 41.) In support, Waymo takes issue with the timing of Uber's production of the Stroz retainer letters. But Waymo leaves out that these documents were produced to defend against Waymo's baseless theory of imputed liability, which Waymo concocted after months of discovery failed to turn up any evidence to support its case as initially pled. (*See* Dkt. 824.) In light of these circumstances, the decision to produce the Stroz retainer letters, much like the "privileged and confidential" mark on the face of those documents that was reconsidered and ultimately found to be incorrect by Uber's outside counsel, reflects no wrongdoing.

Waymo also cites the "Project Zing Review" as an example of a document that was labeled as attorney-client privileged, but later produced. To be clear, Waymo does not—and cannot—argue that the "Project Zing Review" document was improperly withheld. When this issue was addressed before Judge Corley in August, Uber agreed to produce an unredacted version because Uber determined that the attorney input regarding the document was business, not legal, advice on further investigation. (Dkt. 1082.) The other two documents to which Waymo points (OOP Exs. 83, 84) again show that Uber's process of having outside counsel independently assess whether a document is privileged, and queue up mis-labeled documents for production, worked just as it should have—or else Waymo would not have the documents in its hands at all. *See supra* § III.C (response to I.C.4).

E. Incorrect Privilege Designations Have No Relevance and Would Be Prejudicial and Confusing

At bottom, Waymo has not substantiated that it has been denied any discovery through

2.1

improper privilege designations, and any incorrect designation is inadmissible because it has no relevance to Waymo's trade secret claims. Fed. R. Evid. 401, 402; *see also* Dkt. 1885 at 3 (granting motion *in limine* to exclude overruled privilege claims absent leave of Court). To the extent there is any marginal relevance, it is outweighed by its unfairly prejudicial nature and likelihood to confuse the issues for the jury and waste the Court's and jury's time. Fed. R. Evid. 403.

IV. BECAUSE THE JACOBS DOCUMENTS HAVE TURNED OUT "TO BE A

IV. BECAUSE THE JACOBS DOCUMENTS HAVE TURNED OUT "TO BE A NOTHING" IN CONNECTION WITH THE ISSUES IN *THIS* CASE, THERE IS NO BASIS FOR RAISING THE JACOBS DEMAND LETTER OR SETTLEMENT AT TRIAL

Uber argued, and the Special Master agreed, that the resignation email and settlement agreement were not responsive to any document request, and that none of the three documents at issue (including the Jacobs demand letter) were responsive to any Court order. (Dkt. 2396.) Uber disagrees with the Special Master's conclusion that the Jacobs demand letter was responsive to two document requests because nothing in the Jacobs demand letter concerns either "the negotiation of the consideration for the Uber-Ottomotto transaction, the IP acquired, and the satisfaction of certain closing conditions," as requested by RFP 29 (see Dkt. 2396, Special Master Report at 13:10-13), or the "digital or physical" documents or materials that any former Google employee "retained," as requested by RFP 73 (see definition of "Misappropriated Materials"). Further, Waymo conceded that the Jacobs demand letter did not hit on the parties' extensively negotiated search terms. (Ex. 58 at 6 (Waymo's Submission to Special Master).) Nonetheless, Uber chose not to contest the Special Master's recommendation because it ultimately does not matter: the question to be tried in this case is whether Uber misappropriated eight purported trade secrets from Waymo, and there is no "truthful information" that Uber did any such thing—neither in the Jacobs demand letter nor as revealed by the supplemental discovery last month.

Waymo asserts that the Jacobs demand letter is admissible as an "adoptive admission" (Appendix A at Ex. 2), but it does not even try to explain how that exception applies here. It cannot. Uber never manifested "an adoption or belief" of the statements in the Jacobs demand letter, as required by Rule 801(d)(2))(B). That Waymo would advance such a meritless argument

is telling.

22

23

24

25

26

27

28

Moreover, that Uber settled with Mr. Jacobs—and the amount of that settlement—should also be excluded. Waymo's contention that Mr. "Jacobs was paid off" in order to prevent him from disclosing the facts of which he was aware is unsupported. (OOP at 26.) Uber settled Mr. Jacobs's employment claims out of legitimate consideration of the likely monetary cost of litigating his wide-ranging claims, the likely disruption to Uber's business, the reputational harm that could result from Mr. Jacobs's salacious allegations, and the risks to the safety of Uber personnel abroad. (Dkt. 2310, 11/29/17 Hr'g Tr. at 82:22-83:23; id. at 84:15-22.) Moreover, by the Settlement Agreement's express terms, Mr. Jacobs remains free to report his allegations to any agency without running afoul of any confidentiality obligation or triggering a clawback. (OOP Ex. 56 ¶ 11 ("Nothing in this Agreement . . . prevents Jacobs from filing a charge or complaint with, providing documents or information to or initiating or participating in an investigation or proceeding conducted by . . . any [] federal, state, or local agency charged with the enforcement of any laws or regulations."); see also OOP Ex. 57 ¶ 7 ("Nothing in this [a] greement limits or affects consultant's ability to initiate or participate in an investigation or proceeding by any federal, state, or local agency charged with the enforcement of any laws or regulations, including by providing documents or other information."); Dkt. 2310, 11/29/17 Hr'g. Tr. at 30:6-11 ("[W]e have been scrupulous about having settlement agreements that specifically and expressly preserve the employee's right to go to the Government, to go to every possible Government agency and to act as a whistleblower and to, you know, vindicate their rights in whatever way they wish with respect to governing agencies.").)

Most importantly, we now know that neither Mr. Jacobs nor his attorney has anything probative to say about the alleged theft of trade secrets from Waymo or spoliation of communications relating to issues in this case. Thus, even if we assume that Uber did not want Mr. Jacobs to disclose certain information, that information (such as alleged bribery of officials overseas) has no bearing on this case. Because Mr. Jacobs admitted that he has no evidence of trade secret theft—and because his lawyer admitted that the allegation of theft in his demand letter was false—there is no relevance to the amount of the settlement. To the extent the Court

24

25

26

27

28

finds there is any marginal relevance, that relevance is substantially outweighed by the danger of unfair prejudice, confusing the issues, and misleading the jury with the myriad of unrelated allegations raised by Mr. Jacobs. The settlement of Mr. Jacobs's claims thus should be excluded. UBER DID NOT INTENTIONALLY CONCEAL THE JACOBS DEMAND V. LETTER FROM WAYMO OR THE COURT Waymo's pleas notwithstanding, it would not be fair to conclude that Uber intentionally hid the Jacobs demand letter from Waymo or this Court. Waymo concedes—and the Special Master has acknowledged—that the parties negotiated search terms and custodians, and that the search terms did not "hit" on the resignation email, the Jacobs demand letter, or the settlement agreement. (Ex. 58 at 6 (Waymo's Submission to Special Master); Dkt. 2396 at 16 (Report of Special Master).) That goes a long way toward explaining why the Jacobs demand letter was not produced. And while it is easy to criticize Uber in-house counsel Angela Padilla for not providing the Jacobs demand letter to the litigation team, she manages a docket of hundreds of cases and had been instructed to be careful about the distribution of the document so as not to compromise the investigation, as evidenced by testimony from the compliance team: Q. Did you have any discussions with Ms. Padilla about sharing Mr. Jacobs' allegations with anyone else in the Uber legal department? A. I -- I do recall having some discussions. Q. What discussions did you have? A. I -- I was concerned about whether -- I was concerned about the wide dissemination of this information for a variety of reasons. . . . So since my general protocol is put -- you know, provide information on a need-to-know basis, I didn't see the need, again, for the litigation team, other than our ediscovery manager, for purposes of email holds and, you know, to allow for email review, there was really no -- there was no need to share this information. (Ex. 23 (Spiegler Dep. at 151:4-153:7); see also Ex. 13 (Majalya Dep. at 130:25-131:16; 160:2-12; Dkt. 2310, 11/29/17 Tr. at 11:5-6, 21:16-24.) Ms. Padilla emphatically rejected the suggestion that she purposefully hid the Jacobs demand letter from Waymo or this Court.

DEFENDANTS UBER AND OTTOMOTTO'S RESPONSE TO WAYMO'S OFFER OF PROOF Case No. 3:17-cv-00939-WHA sf-3847021

(Dkt. 2310, 11/29/2017 Hr'g Tr. at 84:23 – 85:6 ("When you settled that matter, did you do it

because you didn't want Judge Alsup to find out about it? A. Hell no. Q. And to be clear,

because I don't think it is, you've got to tell this judge: When you didn't give that document to the lawyers at this table, was that purposely intending to keep it away from Google? . . . THE WITNESS: Absolutely not.").)

Waymo's arguments to the contrary are unpersuasive. *First*, Waymo falsely asserts that Uber "intentionally withheld" the resignation email and that the Special Master concluded that Uber withheld "evidence of [the Jacobs demand letter's] allegations"—as distinguished from the Jacobs demand letter itself. (OOP at 2, 3.) But the Special Master concluded that the resignation email was not responsive to any document request or Court order. (Dkt. 2396.) Thus, Uber did not "withhold" it, because Uber had no duty to produce it. (*Id.*) Further, the Special Master declined to conclude that Uber had a duty to disclose Mr. Jacobs's allegations, apart from producing the Jacobs demand letter itself. (*Id.* at 13.) Waymo's assertions to the contrary are false.⁷

Second, Waymo's attempt to manufacture inconsistencies between Ms. Padilla's testimony at the November 29 evidentiary hearing and the testimony from the subsequent discovery period (see OOP at 5-6) is unavailing. Waymo complains that through discovery it learned that Ms. Padilla was tasked with resolving Mr. Jacobs's employment claims, attended the mediation, negotiated the settlement with Mr. Jacobs, and coordinated the cooperation of Mr. Jacobs and his attorney with Uber's compliance investigation. But Ms. Padilla already testified to such matters at the evidentiary hearing. Ms. Padilla testified that she took the following actions with respect to the Jacobs demand letter and allegations therein:

• Convinced Mr. Jacobs's lawyer to put all of Mr. Jacobs's allegations in a letter for the purpose of assessing and understanding them (Dkt. 2310, 11/29/17 Hr'g Tr. at 15:11-15);

⁷ Waymo similarly overreaches in asserting that Uber's "outside counsel" were involved

in the "improper[] withholding" of the Jacobs demand letter. (OOP at 3.) The undisputed evidence is that Uber did not share the Jacobs demand letter with its outside counsel in this litigation. (Gonzalez Decl. ¶¶ 2, 6; Ray Decl. ¶¶2, 5; Tate Decl. ¶¶ 2, 7; Rivera Decl. ¶¶ 11, 15; Dkt. 2352-4 at 17 (Uber's Response to Waymo's Special Master submission).); Dkt. 2329, 12/4/2017 H'rg Tr. at 47:2-15, 48:10-15; Dkt. 2355-17 (12/7/17 Email from L. Randall re

^{12/4/2017} H'rg Tr. at 47:2-15, 48:10-15; Dkt. 2355-17 (12/7/17 Email from L. Randall re Waymo v. Uber –Log of First Communications); Dkt. 2355-18 (12/8/17 Email from K. Dunn re Waymo v. Uber Boies Schiller log).) There is no evidence that outside counsel did anything that remotely could be characterized as "improperly withholding" the Jacobs demand letter.

- After she received the Jacobs demand letter, she met with Joe Spiegler (Uber compliance attorney), Sidney Majalya (same), and Salle Yoo (Uber General Counsel) (id. at 15:16-20);
- She escalated the Jacobs demand letter to the Special Matters Committee and the Audit Committee of the Uber Board (id. at 21:11-15);
- In consultation with the Special Matters Committee, she directed outside counsel to disclose the Jacobs matter to the U.S. Attorney's Office (*id.* at 29:17-23; *id.* at 33:17-25);
- She was involved in the mediation of Mr. Jacobs's employment claims, including direct communications with the mediator, about his communications with Mr. Jacobs/his counsel during the mediation, and information about theories Mr. Jacobs advanced during the mediation (*id.* at 28:20-29:7; *id.* at 67:20-68:1);
- She helped resolve Mr. Jacobs's employment law claims through settlement (id. at 34:9-16); and
- She was knowledgeable about the negotiation of the settlement with Mr. Jacobs and the specific provisions of the settlement and consulting agreements (id. at 57:1-9; id. at 59:3-8; id. at 60:1-4; 63:21-23).

Nor does the privilege log of communications involving Ms. Padilla move the needle. Most of the privileged documents on the log involve the mediation and settlement of Mr. Jacobs's employment claims—in which Ms. Padilla testified she was involved. (OOP Ex. 104 (more than 540 entries involving Littler's Theodora Lee, Uber's outside counsel for Mr. Jacobs's employment dispute; over 500 entries involving Jason Allen, in-house counsel who worked on Mr. Jacobs's employment claims).) That Ms. Padilla forwarded the Jacobs demand letter to two senior members of Uber's Communications Department on June 22, 2017, is not inconsistent with her decision to abide by the guidance she had received not to share the Jacobs demand letter with persons other than those investigating the allegations. (*See* OOP at 6.) On or about that date, the Special Matters Committee had decided that it would self-report the Jacobs demand letter to the government. (OOP Ex. B (Padilla 12/22/17 Dep.) at 165:9 - 166:24; Ex. 4.) Mr. Jacobs had threatened to go to the press the next day, so Ms. Padilla forwarded the Jacobs demand letter to

two senior members of Uber's Communications department with a request that they not to circulate it further, because they would need to be aware of it if Mr. Jacobs involved the press. (Ex. 18 (Padilla 12/22/17 Dep. at 169:10 - 170:11.) In short, there is nothing inconsistent between Ms. Padilla's testimony about the Jacobs demand letter at the evidentiary hearing and the subsequent discovery record.

Third, the undisputed evidence demonstrates that Uber's outside counsel of record in this litigation did not receive the Jacobs demand letter and were not aware of the letter's allegations. (Declaration of Arturo Gonzalez in Support of Defendants' Response to Waymo's Offer of Proof ("Gonzalez Decl.") ¶¶ 2, 6; Declaration of Eric Tate in Support of Defendants' Response to Waymo's Offer of Proof ("Tate Decl.") ¶¶ 2, 7; Rivera Decl. ¶¶ 11, 15; Declaration of Wendy Ray in Support of Defendants' Response to Waymo's Offer of Proof ("Ray Decl.") ¶¶ 2, 5.) As Uber informed the Court on December 4, the Jacobs resignation email was forwarded to Messrs. Gonzalez and Tate. (Dkt. 2342, 12/4/17 Hr'g Tr. at 46-50.) In the subsequent course of preparing a privilege log, Uber's counsel determined that in April 2017 one of the two MoFo partners who were handling the compliance matter for Uber had sent an email seeking information about ediscovery at Uber for purposes of planning and commencing ediscovery on the compliance matter. (Rivera Decl. ¶ 12; Ray Decl. ¶ 3.) Ms. Rivera and Ms. Ray, counsel of record for Uber in this litigation, responded to the email with information about Uber's ediscovery resources and personnel. (Rivera Decl. ¶ 13; Ray Decl. ¶ 3.) The bottom of that email chain included the Jacobs resignation email, but Ms. Rivera and Ms. Ray were not involved in any discussions about it and did not notice the resignation email. (Rivera Decl. ¶ 14; Ray Decl. ¶ 3.) Indeed, given that the emails were exchanged on April 26-27, 2017, while Uber's team was busy preparing Uber's sur-reply on preliminary injunction due April 28, and that it was not necessary to review the resignation email to answer Ms. Sprenkel's eDiscovery questions, it is unlikely they read the resignation email. (Rivera Decl. ¶ 14; Ray Decl. ¶ 4.) In any event, as the Special Master concluded, the resignation email was not responsive to any Waymo document request or Court order. (Dkt. 2396.) Critically, the statement from Mr. Gonzalez that Waymo cites on page 6 of its Offer of Proof remains 100% corroborated: "nobody on this defense team

2.1

knew about that letter before we got your order and . . . the letter from the U.S. Attorney." (OOP at 6 (quoting Dkt. 2309 (11/28/17 Hr'g. Tr. at 150:8-11)).)

The 37 pages of allegations in the Jacobs demand letter are either irrelevant to the claims and defenses in this litigation or, where arguably relevant, demonstrably false, as demonstrated above (*supra* Section II). Uber had no motive to intentionally conceal the Jacobs demand letter from Waymo or the Court, and it did not so conceal it.

VI. UBER DID NOT INTERFERE WITH WAYMO'S EFFORTS TO TAKE JACOBS-RELATED DISCOVERY

During the last round of discovery, Waymo obtained supplemental discovery related to the Jacobs allegations, including 17 depositions and thousands of documents. Waymo's contention that Uber thwarted Waymo's supplemental discovery efforts is a massive overreach. (OOP at 7-12.) Waymo's Offer of Proof takes issue with every petty alleged transgression it could marshal, but its arguments fail because Uber did not engage in misconduct, Waymo was not prejudiced, and Waymo waived certain arguments by failing to raise them with Judge Corley.

A. Uber's Document Production Was Timely and Fulsome

On an extraordinarily compressed schedule, Uber responded to 42 supplemental document requests from Waymo, produced approximately 7,000 documents, and identified another 4,000+ responsive but privileged documents (compared to the 13 documents Waymo produced and the 10 it logged in response to Uber's supplemental document requests). (Rivera Decl. ¶ 2.) Uber cooperated with Waymo's attempt to cast a wide net, agreeing to nearly all of Waymo's broad document requests. (Rivera Decl. Exs. A, B.) Uber had only two weeks from the day it received Waymo's document requests to identify custodians and collect and review their data for production. In that short period of time, Uber collected documents from at least 40 new custodians who previously were not custodians in this litigation, performed supplemental collections for certain pre-existing custodians, and reviewed more than 135,000 documents during the supplemental discovery period. (*Id.* ¶ 4.) By December 14, the date by which Judge Corley directed Uber to complete its production, Uber had produced approximately 4,500 documents and identified over 4,000 privileged documents. (*Id.* ¶ 7.)

Waymo objects that additional documents "trickled in" on December 15, 16, 19, 20, and 23 (OOP at 8), but that assertion is misleading. Working around the clock, on December 15 at 2:07 a.m. Uber produced just 80 documents that had not been produced two hours earlier, by December 14 at midnight. (Rivera Decl. ¶ 8.) Most involved communications with in-house counsel and were produced with redactions for privilege, which delayed the review and production process. (*Id.*) The December 16 production consisted of only 13 documents related to MoFo's communications regarding the Jacobs documents that were produced pursuant to a December 13 telephonic hearing with Magistrate Judge Corley. (*Id.*) That was not a late production. Nor were the productions on December 19 or 28, which consisted of two documents that Waymo had only requested from Uber on December 16, late. (*Id.*) On December 20, Uber produced just six documents, which it had only recently identified. (*Id.*) Contrary to the statement in Waymo's Offer of Proof, Uber did not produce any documents on December 23. (*Id.*)

As Waymo notes, Uber produced 24 documents on December 30 as a result of an issue detected by Uber ediscovery specialists over the Christmas holiday: Uber's document review team was inadvertently provided an incomplete set of results for one of the searches run on inhouse counsel emails. (*Id.* ¶ 9.) On December 29, Uber informed Waymo of this error and stated that it would thus be making a small supplemental production and would supplement the Padilla privilege log as needed. (*Id.*) Uber made the production the next day and on January 11 served a supplemental privilege log. (*Id.*) Waymo already attempted to assert to Judge Corley that those documents were being improperly withheld from production (Dkt. 2441-4 at 3 n.2), but Judge Corley took no action after Uber explained the circumstances (Dkt. 2450 at 5 n.2; 2454.)

Thus, looking past the surface of Waymo's protestations, it is clear that only a small number of documents were produced after the expedited production deadline. Critically, Waymo does not contend, much less demonstrate, that it suffered any prejudice as a result. And with one exception noted above, Waymo failed to raise this issue with Judge Corley, thus waiving it.

Instead, Waymo merely complains that "nearly two-thirds of Uber's production (by number of pages) was produced after the deadline originally imposed by the Special Master," a

figure that is grossly misleading. While it is true that the Special Master stated that Uber should complete its production by December 8, just six business days from receipt of Waymo's 42 document requests (and Uber produced over 3,000 documents by that date), Judge Corley gave Uber until December 14 because Uber's counsel believed Uber could complete its production by that time. (Dkt. 2395, 12/13/17 Hr'g Tr. at 21-22; Rivera Decl. ¶ 7.) Moreover, the plurality of documents from Uber's production consists of the documents that Mr. Jacobs had transferred to a thumb drive or stole and then returned to Uber – 13,470 pages. The parties disputed their relevance and responsiveness; on December 20, Judge Corley ruled that they might be relevant, and Uber produced them on December 22. (*Id.* ¶ 10.) Excluding that production, nearly 73% of Uber's production was completed by December 8, and over 97% by December 14. (*Id.*)

At bottom, Uber made a Herculean effort to collect, review, and produce data for scores of new custodians on a highly expedited two-week schedule, produced virtually all such documents by December 14, and Waymo does not—because it cannot—show that it was prejudiced by any production received after that date.

B. Uber Did Not Frustrate Discovery Directed to Its Outside Counsel

Waymo's contention that Uber frustrated its attempt to investigate the extent to which Uber's outside counsel was aware of the Jacobs documents during regular discovery (OOP at 8-9) was already rejected by Judge Corley. In briefing before Judge Corley on December 20, Waymo trotted out the same complaint about the privilege log of MoFo communications and sought a finding that Uber waived privilege over certain log entries and *in camera* review of all of the others. (Dkt. 2415.) Judge Corley squarely rejected Waymo's request:

The Court declines to find that Uber has waived the attorney-client privilege with respect to the 60 newly logged documents given the expedited time frame it has had to respond to Waymo's discovery requests. Having reviewed the highlighted privilege log, the Court is not concerned that any of the logged documents has been improperly withheld; indeed, Waymo does not point to anything that suggests these documents are not privileged.

(Dkt. 2415 at 2.) Waymo did not move for relief from that order.

Nor did Waymo subsequently renew its request to depose Uber's outside counsel, much less move for an order, despite its purported concerns about "which counsel knew what, and

when." (OOP at 9.) At any rate, as discussed above and in the concurrently filed declarations, the undisputed evidence reflects that Uber's trial team did not know of the Jacobs allegations before November 22.

C. Uber Responded in Good Faith to Interrogatory No. 1

Uber's initial response to this interrogatory identified 19 current or former Uber personnel who received the Jacobs resignation email or demand letter before November 22, 2017, along with the date of receipt, and objected on vagueness and other grounds to the request to identify persons who were merely "aware" of the Jacobs demand letter or resignation email. Although Judge Corley overruled Uber's objection, she did not find that Uber's objection was made in bad faith and her order provided some clarity that previously was missing: the interrogatory seeks the identity of persons aware of the Jacobs demand letter or email, not just of the allegations made therein. (Dkt. 2454.) During the parties' meet-and-confer, Waymo indicated that it sought to know "who was aware of the documents and the fact that the allegations were contained in the Jacobs documents," without specifying which allegations. (Ex. (12/28/17 email summary of meet-and-confer).) Based on the order, Uber's supplemental response identified five others who were "aware" of the Jacobs demand letter but did not receive it, and four others who were "aware" of the resignation email but did not receive it. Five of those personnel were also deponents. Waymo asked two of them about their awareness of the Jacobs demand letter (Ex. 11 (Kalanick Dep. at 637:21-638:18); Ex. 2 (Clark Dep. at 301:23-302:9)) and questioned another about a June 21, 2017 email sent on behalf of Jake Nocon, Edward Russo, and Nick Gicinto regarding the Jacobs allegations. (Ex. 17 (Nocon Dep. at 235:6-241:25).) Waymo could have explored these topics with these deponents as much as it wanted. As to the others, Waymo cites only the fact that Uber's CEO Dara Khosrowshahi became aware of the Jacobs demand letter at some point before November 22 (OOP at 9), but does not explain how that is relevant to the claims or defenses in this action. Nor does Waymo assert, let alone persuade, that it was prejudiced in any way.

D. It Is Not Surprising that Many Responsive Documents Were Withheld as Privileged, Given the Subject Matter at Issue and Involvement of In-House and Outside Lawyers

Waymo also assails Uber for withholding several thousand documents on privilege grounds. (OOP at 9-10.) It is not surprising that there would be many privileged documents, considering the subject matter and that documents were collected from numerous in-house counsel (and, in some instances, outside counsel). *Cf. In re Imperial Corp. of Am.*, 174 F.R.D. 475, 478–79 (S.D. Cal. 1997) (where subpoenas called for hundreds of thousands of documents created by plaintiff and their counsel, "it would be foolish to believe that very many of those documents would be other than protected by the attorney-client privilege or work product" doctrine). With specific regard to Ms. Padilla's communications, most of those documents involve the mediation and settlement of Mr. Jacobs's employment claims, topics for which one would expect numerous privileged communications. (*See supra* Section V.)

Regurgitating the same argument it made to Judge Corley without success, Waymo makes much of approximately 80 documents Uber produced on December 22 involving Ms. Padilla. (OOP at 10.) Those documents were provisionally deemed privileged and subsequently voluntarily de-designated or determined to warrant production with redactions. (Ex. 72 (12/22/17 Rivera email to Roberts).) As Judge Corley noted in response, "given the compressed time frame [Uber] had for production it is unsurprising that some documents would have been initially improperly withheld or inconsistently redacted." (Dkt. 2454 at 2.) Nothing about these events supports admitting evidence of the Jacobs issues at trial.

Nor is Waymo's complaint about Uber's supplemental Padilla privilege log well taken. In a one-liner, Waymo contends that Uber's service on January 11 of a supplemental log "should result in waiver of the privilege of these 548 additional entries." (OOP at 10.) Not so. As explained above, Uber informed Waymo on December 29 of documents that inadvertently were missing from the search results it reviewed and that it would be supplementing the Padilla privilege log as a result. (Ex. 70.) Waymo brought this to Judge Corley's attention in its final motion to compel in support of its unsuccessful request for in camera review of nearly 1,000 documents, but it did not argue that Uber waived privilege over any new documents that would

appear on the log. Waymo therefore waived any such argument. Moreover, although Waymo asserts in a conclusory manner that the production of the supplemental Padilla log is "obviously prejudicial" (OOP at 10), it fails to explain how. Waymo did not challenge the "privileged" status of even a single entry on the 755-entry Padilla privilege log Uber served on December 21. Nor has it challenged any entry on the supplemental January 11 log. Indeed, it seems the only reason Waymo wanted a privilege log of Ms. Padilla's communications was to report the number of log entries in its Offer of Proof, which it has done. *Cf. Sprint Commc'ns Co. L.P. v. Comcast Cable Commc'ns LLC*, No. 11-2684-JWL, 2015 WL 1204975, at *2 (D. Kan. Mar. 17, 2015) (precluding plaintiff from relying on "sheer volume of privileged communications" to add willful infringement claim or present evidence of defendants' retention of counsel). Once again, there is simply no prejudice.

E. Uber Did Not Improperly Instruct Witnesses During Deposition, and Waymo Waived Any Arguments to the Contrary

Waymo complains that Uber improperly instructed eleven deponents not to answer questions based on attorney-client privilege, work product, and "national security" grounds. (OOP at 10-12.) Yet Waymo never raised any such issues with Judge Corley as to even one deposition, even though it filed multiple discovery motions during the most recent round of discovery. Having failed to raise these issues with Judge Corley, Waymo has waived its right to now claim that any instruction was improper.

If Waymo had raised these issues with Judge Corley, it would have lost. Waymo first complains that Uber improperly instructed witnesses not to answer questions about facts to the extent such facts happened to have been communicated from an attorney (OOP at 11), but a review of the testimony reveals that Waymo is wrong. For example, Ms. Yoo could not discuss what she knows about API scraping because doing so would divulge the *results of an investigation performed by counsel*. (Ex. 27 (Yoo 12/14/17 Dep. at 191:11-20)); *cf. In re Grand Jury Subpoena Dated October 22*, 2001, 282 F.3d 156, 161 (2d Cir. 2002) ("While it may well be that work product is more deeply concerned with the revelation of an attorney's opinions and strategies, . . . we see no reason why work product cannot encompass facts as well.").

28

Similarly, Waymo asked Uber Board members about the results of WilmerHale's investigation into the Jacobs allegations, whether WilmerHale had made recommendations to the Special Matters Committee, and what the Board members knew about certain subjects (e.g., the use of non-attributable devices and ephemeral communications)—all questions that called for privileged communications regarding the results of WilmerHale's investigation. (OOP Ex. E [12/19/17 Huffington Dep. Tr.] at 49:7-17, 86:4-87:4, 91:7-14; 12/15/17 Trujillo Dep. Tr. at 74:10-74:17, 74:20-75:3.) For the same reason, Mr. Sullivan could not testify to why Uber stopped or changed its use of ephemeral communications in the fall of 2017 because, as he stated during his deposition, doing so would divulge the substance of privileged communications with Uber's legal department. (OOP Ex. C (Sullivan Dep. at 221:13-222:5).) Each is a proper invocation of privilege. and Nocon to block answers to a handful of questions, primarily about whether certain SSG personnel and vendors were formerly employed by an intelligence agency (OOP at 11), is

Waymo's assertion that Uber "allowed" the personal attorneys of Messrs. Russo, Gicinto, similarly misplaced. Uber does not control those individuals' personal attorney, and Uber did not instruct the witnesses not to answer.

Nor is there any merit to Waymo's complaint that Uber's counsel improperly instructed attorney-witnesses not to answer questions that would reveal their "mental impressions." Counsel's "mental impressions," even if not reduced to writing, are protected from discovery. U.S. Bank N.A. v. PHL Variable Life Ins. Co., 2013 U.S. Dist. LEXIS 143398, *23-*24 (S.D.N.Y. Oct. 3, 2013) ("Although work product protection typically accrues to documents and tangible things, the doctrine also protects a witness from answering questions that "reveal [his] attorneys' legal opinions, thought processes, [or] strategy.") (quoting Securities and Exchange Commission v. Gupta, 281 F.R.D. 169, 171 (S.D.N.Y. 2012)); see also Banks v. Office of the Senate Sergeantat-Arms, 222 F.R.D. 1, 4 (D.D.C. 2004) ("The federal courts also protect work product even if it has not been memorialized in a document. Questions of a witness that would disclose counsel's mental impressions, conclusions, opinions or legal theories may be interdicted to protect 'intangible work product.'"). Uber's counsel properly instructed attorney-witnesses not to answer

2.1

questions that call for an attorney's mental impressions. For example, Waymo asked Ms. Yoo for her legal opinion on whether the allegations in the Jacobs demand letter were material to the Waymo litigation, her opinion on whether personnel in security should have been involved in the investigation of the Jacobs allegations, and whether she agreed or disagreed with certain opinions voiced by Uber's outside counsel regarding the investigation. (Ex. 27 (Yoo 12/14/17 Dep. at 254:6-15; 289:5-24; 346:5-9).) Each of those questions calls for her "mental impressions" as a lawyer, which is protected from disclosure. Waymo similarly asked current and former Uber inhouse counsel: (i) about what they learned in the course of investigatory tasks; (ii) to identify specific allegations from the Jacobs resignation email that were of concern; and (iii) to determine whether certain activity is legal or illegal. (OOP Ex. K (Spiegler Dep. at 89:6-22); Ex. F (Majalya Dep. at 125:14-20); Ex. J (Clark Dep. at 182:6-25).) That would invade Uber's privilege.

In the specific example Waymo discusses involving Mr. Clark, Waymo grossly misstates the testimony. (OOP at 11.). Contrary to Waymo's assertion (*id.*), Uber did not instruct Mr. Clark not to answer whether he had ever marked a document as privileged "when he did not believe such document was privileged." The question was whether he had ever so marked a document "when [he] [was] not providing legal advice in a document" (OOP Ex. J (Clark Dep. at 195:23-25).) Those two questions are not synonymous. And in the specific example Waymo provides for Ms. Padilla (OOP at 11), Waymo cites deposition testimony in which Ms. Padilla was instructed not to answer questions about her state of mind regarding the Jacobs resignation email—not about the Jacobs demand letter, as Waymo incorrectly argues (*id.*). (OOP Ex. B (Padilla 12/22/17 Dep. at 153:14-23).) Ms. Padilla did not testify about the resignation email at the evidentiary hearing.

Finally, in many instances, the witnesses actually answered the questions Waymo complains they were instructed not to answer. (*Compare* OOP Ex. C, 12/14/17 Sullivan Dep. at 218:11-22 *with id.* at 218:23-219:8, 221: 1-4; *compare* OOP Ex. D, 12/15/17 Trujillo Dep. at 75:4-11 *with id.* at 75:14-23; *compare* OOP Ex. D, 12/15/17 Trujillo Dep. at 91:23-92:6 *with id.* at 92:7-16; OOP Ex. G (Gicinto Dep. at 225:5-226:13).) In the case of attorney-witnesses,

witnesses answered where they could without running afoul of privilege/work product protections. (*Compare* OOP Ex. A, 12/14/17 Yoo Dep. at 354:2-7 *with id.* at 354:9-13; OOP Ex. F (Majalya Dep. at 162:24-163:6, 164:9-165:10-23); *compare* OOP Ex. B (Padilla 12/22/17 Dep. at 164:18-24) *with* Chang Decl. Ex. 18 (Padilla Dep. at 165:1-169:24).)

The discovery record during this latest round of discovery is clear: Uber worked diligently to provide Waymo with an extensive amount of document and deposition discovery in an extraordinarily short period of time. It is equally clear that despite all of that discovery, Waymo found nothing that is relevant to its claim that Uber misappropriated its alleged trade secrets.

VII. WAYMO'S ATTEMPT TO CONNECT THE JACOBS MATERIALS TO OTHER ALLEGED MISCONDUCT IS MERITLESS

After a month of intensive discovery into the Jacobs documents, Waymo has come up empty. Lacking a compelling tale of spoliation, Waymo seeks to amplify its allegations by recycling past discovery issues that were raised—sometimes repeatedly—and resolved long ago.

A. Waymo's Attempt to Connect the Jacobs Allegations to Other Alleged Improper Use of the Attorney-Client Privilege Is Meritless

Waymo attempts to use the Jacobs allegations to relitigate issues that it lost before Judge Corley, such as Uber's assertion of privilege over post-April 11, 2016 documents concerning the Stroz due diligence. These now-resolved disputes should not persuade the Court to admit Mr. Jacobs's unsubstantiated allegations.

1. Defendants' Assertion of Privilege As to the Stroz Materials Was Made in Good Faith

Waymo argues Uber's assertion of privilege over the Stroz materials *delayed* the production of relevant information (OOP at 40), but it cannot argue it *prevented* production of relevant material. Any delay was the result of Uber's good-faith assertion of privilege. There has been no finding Uber acted in bad faith in asserting the privilege. Moreover, Uber did not appeal this Court's decision about the Stroz materials to the Federal Circuit; Levandowski did, and Uber could not unilaterally waive the privilege over his objection. The only document Waymo cites in

support of its claim that the privilege here must have been in bad faith is its *own prior briefing*. (Dkt. 2053-4.) Neither Judge Corley nor this Court has ever so held.⁸

Judge Corley recognized the privilege issues involved with the Stroz investigation were "complicated" issues of "first impression." (Dkt. 734, 6/23/17 Hr'g Tr. at 40:11-12.) This Court also acknowledged the argument that Uber (and Waymo) "acted in good faith" in their respective privilege assertions (Dkt. 1872, 9/27/17 Hr'g Tr. at 25:14-20), and cautioned Waymo that it would vigorously police Waymo's attempts to point the finger at Uber regarding any delay in production of the Stroz materials, because Levandowski was the one who appealed the Court's rulings to the Federal Circuit—not Uber. (*See id.* at 24:21-23 ("And, by the way, there came a point where Uber did not oppose producing. It was Levandowski who was the one who was resisting it."); 30:20-31:2 ("If they say the word 'they,' I'm going to interrupt and tell the jury that's not a true statement. It wasn't 'they.' It was Levandowski who appealed. That's the way you always present it, is 'they.' But I know the truth. And the truth is that Uber was willing to turn that over earlier; much earlier. So if you do present that argument, you've got to say Levandowski caused the delay; not that Uber did.").)

Uber's assertion of privilege over the Stroz materials was no more improper than Waymo's various (overruled) assertions of privilege. Judge Corley overruled Waymo's privilege assertions on multiple occasions. (Dkts. 1272 (holding Waymo waived privilege over forensic investigation), 1511 (holding Waymo improperly claimed privilege over non-privileged communication).) It also took a Court order for Waymo to produce documents within the scope of its privilege waiver over the forensic investigation into Levandowski, which Judge Corley described as "the centerpiece" of Waymo's case. (Dkt. 1414, 8/28/17 Hr'g Tr. 14:22-15:22; see

⁸ Waymo asserts that "no [c]ourt who considered the issue" has upheld Uber's assertion of privilege over the Stroz investigation (OOP at 41). Waymo is wrong. At a hearing on January 11 and in a public order issued January 16, San Francisco Superior Court Judge Harold Kahn held that the Stroz materials, including the final report and exhibits, all drafts of the report, "any interim summaries, findings, or analyses by Stroz" and "all interview memoranda or summaries related to the 'diligenced' former Google employees" are protected by the attorney-client privilege, and that the privilege was not waived or lost when Uber, Otto, Anthony Levandowski, and Lior ron shared those materials between themselves because the parties shared a common interest at the time. (Chang Decl. ¶ 1, 2 (Ex. 75 (State Court Order).) While Uber recognizes that this Court disagrees, Uber's assertion of privilege has always been made in good faith.

2.1

also Dkt. 1272.) Surely, Waymo would readily agree that Judge Corley's disagreement with Waymo's privilege calls does not mean Waymo acted in bad faith when pursuing its claims of privilege. And Waymo would certainly disagree that its "stonewalling" with respect to the production of key documents relating to its forensic investigation necessarily means that it acted in bad faith. (Dkt. 1872, 9/27 Hr'g Tr. 28:9-15 ("So -- but the fact is that you stonewalled, and didn't turn this information over until very late in the game. And you claimed that it was because of privilege, which the Judge overruled you on. All right. Now, maybe you had a good-faith basis; but [Uber] had a good faith-basis on the Due Diligence Report. And if one is going to come in, the other's going to come in.").)

Uber's occasional appeals of Judge Corley's rulings are not indications of bad faith. Indeed, Google—Waymo's parent company—unsuccessfully appealed privilege issues *from this Court to the Federal Circuit* just a few years ago. *In re Google Inc.*, 462 F. App'x 975, 976 (Fed. Cir. 2012). In *Oracle v. Google*, Google clawed back all versions of an allegedly privileged email from Timothy Lindholm—an email on which the author had copied a lawyer on a nonprivileged document at the very last minute, and slapped on an "attorney-client privilege" header without ever seeking legal advice. When Google failed to convince Judge Ryu that the document was privileged, Google appealed to this Court. When Google then lost before this Court as well, it appealed to the Federal Circuit. Only when it lost before the Federal Circuit was the issue resolved. *Id.* at 977.

Waymo points to other case events to attempt to bolster its claim that Uber improperly asserted privilege here. Yet again, Waymo misleadingly omits important context, including leaving out the details of extensive motion practice before Judge Corley:

• Waymo argues that the privilege logs associated with the Stroz materials suffered from "deficiencies," again citing only its own motion as evidence. (OOP at 40, citing Dkt. 321.) Waymo omits that Judge Corley found Uber's log to be sufficient after Uber made a few modifications, holding that "[w]hile the above discussion shows there are deficiencies with the current log, the Court does not find them so egregious that Uber should have to produce otherwise protected material, especially given the volume of log entries and the

- brief period Uber had to reevaluate the privilege log in light of the MTC Order." (Dkt. 731 at 6.)
- Waymo argues that, unlike other Ottomotto employee attestations, Levandowski's attestation "did not attest that he had not stolen trade secrets from his former employer," and complains that Uber incorrectly withheld this document on privilege grounds. (OOP at 42 (contrasting Ex. 90 with Ex. 103).) But that is false. Waymo compares a document that new hires signed when joining *Ottomotto* (Waymo Ex. 90) with a document that only the five diligenced employees signed (Waymo Ex. 103) after completing the *Stroz* due diligence. Uber has never asserted privilege over Ottomotto attestations, and Waymo received those attestations in April. (OOP at 42 n. 25.) Uber only asserted attorney-client privilege over the *Stroz* attestations until the privilege issues surrounding the Stroz diligence were resolved by the Federal Circuit, at which point Uber produced them. Uber's privilege positions on these two distinct sets of documents are not in conflict and do not reflect any wrongdoing.
- Waymo argues that "Defendants created the convoluted 'due diligence' apparatus, layered with and purportedly directed by attorneys, for no reason other than to establish a pretext against discoverability in civil litigation." (OOP at 41.) But Stroz Friedberg's co-President confirmed that Stroz is generally retained by "outside counsel acting on behalf of their corporate clients in order to give their corporate clients legal advice." (Ex. 4 (Friedberg Dep. at 23:24-24:5).) And Waymo knows that there is nothing nefarious about structuring engagements this way because *Google has likewise directed its outside counsel to retain Stroz Friedberg to conduct forensic analyses*. (See Ex. 53 (June 3, 2010 Source Code Analysis report, at 1) ("Stroz Friedberg was retained by Perkins Coie, on behalf of Google, to evaluate the source code of an executable...").)

As noted above, Uber's good-faith assertion of privilege over the diligence process is not an unjustifiable position to take in litigation, as Google well knows. *See In re Google Inc.*, 426 F. App'x at 976.

2.1

2. Waymo's Rehashed "Sword and Shield" Arguments Do Not Constitute Discovery Misconduct

Waymo's tired "sword and shield" arguments ring hollow. All of the issues it raises have either been fully litigated or were never raised before the Court when Waymo had a chance to do so.

First, Waymo points to motion practice regarding a conversation about Levandowski's downloading of Google documents. (OOP at 42-43.) The Court resolved this issue five months ago, finding that Uber could not present evidence of the March 29 conversations at trial, subject to stated exceptions. (Dkt. 1267; *see also* Dkt. 1885 (granting Waymo MIL to preclude introduction of evidence as to why Levandowski downloaded Google documents).) The Court has already granted Waymo all of the relief to which it could possibly be entitled. Waymo's own glass house is on full display here, as Waymo fails to acknowledge that it too aggressively litigated its claims of privilege and that Judge Corley overruled Waymo's assertion of privilege over its forensic investigation into Levandowski and other former employees. (Dkt. 1272.) This Court has likewise already ruled how it will handle at trial evidence and argument of *both sides*' assertions of privilege throughout this litigation—that the parties cannot reference any assertions without first fully vetting the issue with the Court. (Dkt. 1885.)

Second, Waymo takes issue with evidence showing that Levandowski was terminated from Uber for failing to cooperate with Uber in this lawsuit. (OOP at 43-44.) This is the topic of a pending motion *in limine*. (Dkts. 1551-4, 1552-5, 2041-4, 2092-4.) The admissibility of that evidence has nothing to do with the admissibility of Jacobs-related issues. Without rehashing that briefing, Uber corrects two errors in Waymo's revisionist history. At Levandowski's August 22 deposition, Uber appropriately asked Levandowski about the *fact* of his non-cooperation and then appropriately asserted privilege in response to Waymo's inquiries about "what specifically did *Uber's lawyers tell you*..." (OOP at 44 (citing Levandowski Dep. at 271:13-272:18, 296:11-299:10 (emphasis added).) Waymo continues to ignore the hornbook distinction between privileged communications and non-privileged facts. *See Upjohn Co. v. United States*, 449 U.S. 383, 395-96 (1981) (privilege "only protects disclosure of communications; it does not protect

disclosure of the underlying facts ... A fact is one thing and a communication of that fact is an entirely different thing.") (internal citations omitted).

Waymo also selectively cites Judge Corley's order regarding the production of documents bearing on Levandowski's non-cooperation. (OOP at 43 (citing Dkt. 1506).) But that order, when read in full, demonstrates that there is no sword and shield issue. Judge Corley noted that there are several communications bearing on Levandowski's non-cooperation that Waymo "does not contend" are privileged. (Dkt. 1506 at 2.) In other words, Uber can establish Levandowski's non-cooperation without resort to any privileged communications. Moreover, after ordering Uber to produce two additional documents that were referenced in those non-privileged communications, Judge Corley rejected Waymo's sword-and-shield argument as "unpersuasive and unsupported by citation to any authority." (*Id.*) The order went on to observe that, "[u]nder Waymo's reasoning," Waymo likewise would have engaged in a selective (and impermissible) waiver of privilege. (*Id.*) In short, if this type of privilege dispute amounted to evidence of discovery misconduct (and it does not), then Waymo is just as culpable.

Waymo opportunistically argues at the eleventh hour and through procedurally improper means that Uber's previously-acceptable privilege calls are suddenly improper. If Waymo disagreed with privilege invocations during depositions that occurred in August and October of last year, it should have moved to compel. It did not. If Waymo disagreed with Judge Corley's privilege determinations regarding communications bearing on Levandowski's non-cooperation, it should have sought relief from those orders. It did not. If Waymo disagreed with Judge Corley's and this Court's privilege determinations regarding post-April 11, 2016 documents related to the Stroz investigation, it should have sought relief from the Federal Circuit. It did not. These invocations were not improper at the time, and they are not now.

B. Uber Diligently Complied with the Court's Provisional Relief and Expedited Discovery Orders and Did Not Improperly Withhold Documents

Waymo's arguments regarding Uber's purported "habit" of violating the Court's orders and failing in its discovery obligations are erroneous or, at best, are based on a grossly incomplete

28

recitation of the record, and are unaccompanied by any showing that Waymo has suffered actual prejudice. Uber addresses each of Waymo's contentions in turn.

First, continuing its pattern of half-truths, Waymo claims that Uber "willfully" violated Paragraph 4 of the Court's March 16, 2017 Order Re Expedited Discovery and Related Matters (Dkt. 61) and Paragraphs 2 and 4 of the Court's Order Granting in Part and Denying in Part Plaintiff's Motion for Provisional Relief (Dkt. 426). (OOP at 34:4-26.) Repurposing the arguments it made nearly three months ago, Waymo claims that Uber: (1) failed to disclose Stroz's possession of "over 100 Levandowski devices," and (2) somehow "took full advantage" of Levandowski's Federal Circuit appeal to prevent Waymo from discovering "downloaded material" in the possession of Uber's agents, in particular, a "sliver" of documents in the possession of MoFo. (OOP at 34-35.) Uber addressed these arguments in September and October. (See Dkts. 1502, 2084.) The arguments were meritless then and remain so today.

Uber never "concealed" that certain Levandowski devices were in the possession of Stroz. (OOP at 34.) Uber's Paragraph 4 accounting accurately stated: "Stroz retained all personal devices except for Levandowski's phone." (Dkt. 1170 at 7.) Uber also took steps to compel Levandowski to turn over his devices for inspection. (See Dkt. 2084 at 2:1-16.) When he refused, Uber worked through his counsel to search the devices for the 14,000 files referenced in Waymo's preliminary injunction papers, along with the related hash values and search terms. (*Id.*) Although Uber provided those search results to Waymo on June 19, 2017, Waymo chose not to inspect them. (*Id.*) Thus, far from "conceal[ing]" the existence of Levandowski's devices, Uber took steps to disclose the information available to it.

Waymo's claim that Uber failed to adequately disclose the "sliver" of documents at MoFo—something Waymo calls an "egregious example" of Uber violating this Court's orders is similarly erroneous. (OOP at 35.) Waymo ignores that Uber did not know that MoFo had the "sliver," because the sliver was received by MoFo after this lawsuit was filed as part of MoFo's

⁹ Waymo fails to mention that Stroz collected *all* of Levandowski's personal devices,

some of which were "very old" and had nothing to do with his time with, or work for, Waymo. (See Dkt. 1261, 8/16/2017 Hr'g. Tr. at 21:18-22:15.)

short-lived representation of Levandowski in the separate arbitration. (See Dkt. 1261, 8/16/2017
Hr'g Tr. at 20:11-23:16 (noting, in part, that "The information that we [MoFo] have, we don't
plan to use at all, is information that we received while we represented Mr. Levandowski in the
arbitration. And the only reason we are withholding it, Your Honor, is because the same reason
we've already discussed. Mr. Levandowski has informed us in writing that he's asserting his
rights which you've acknowledged that he has under Hubbell and Fisher.").) Uber cannot be
sanctioned for something it was not aware of, and MoFo held it not in its capacity as counsel for
Uber but as counsel for Levandowski. Further, Waymo omits that Uber disclosed as early as
August 2017, in response to this Court's question, that the "sliver" consisted of tens of thousands
of files. (Id. at 21:18-22.) Finally, Waymo's arguments fail to take into account the impact of
Levandowski's appeal to the Federal Circuit. Neither the "sliver" nor the exhibits to the Stroz
Report could have been produced until Levandowski's appeal was resolved, long after Uber's
responses to the Court's orders came due. Uber can hardly be faulted for bearing with
Levandowski's assertion of his privileges while the appeal was pending.
Second, Waymo's assertion that Uber violated Paragraph 5 of the Court's Order Granting
in Part and Denying in Part Plaintiff's Motion for Provisional Relief (Dkt. 426) is meritless.
Wasser also dead III and a Great to 1 and IDAD male to 1 and a second in a Great and

Second, Waymo's assertion that Uber violated Paragraph 5 of the Court's Order Granting in Part and Denying in Part Plaintiff's Motion for Provisional Relief (Dkt. 426) is meritless. Waymo claims that Uber's efforts to log LiDAR-related communications were insufficient. Nonsense. As Uber stated on September 15, 2017, "Uber conducted over 170 interviews, reviewed over 25,000 documents and spent over 700 hours preparing the 'LiDAR log' concerning communications with Mr. Levandowski required by Paragraph 5." (Dkt. 1592 at 2:3-5.) Uber also took steps to ensure that its log was overly inclusive by listing "references not just to LiDAR but to lasers, lenses, and point clouds, as well as communications where others may have mentioned LiDAR and related concepts to Mr. Levandowski." (Id. at 2:7-9 (emphasis in original).) To be sure, Uber timely supplemented its log whenever it identified additional information through the course of discovery, including Uber's review of hundreds of thousands of documents in the months after the log was initially due. But Uber's efforts to ensure complete disclosure are hardly a basis for claiming that Uber "willfully" violated the Court's orders. Indeed, if Uber hadn't supplemented its log, Waymo would have certainly cried foul. Finally,

Waymo fails to mention that none of the messages included in Uber's "tardy disclosure" explicitly mentioned "LiDAR," thus explaining why they were not captured in Uber's initial, expedited review. (*Id.* at 2:15-26.)¹⁰

Third, Waymo's complaints regarding the timing of production for certain custodians vis-à-vis their depositions should be summarily rejected. Uber moved heaven and earth to comply with the fast discovery schedule in this case, including making every effort to produce documents in advance of each deposition. For the most part, Uber was successful. And, when it wasn't, Waymo suffered no prejudice, because Waymo reserved deposition time with certain witnesses to use once the Federal Circuit ruled on Levandowski's appeal; Waymo also deposed these witnesses on documents unrelated to Stroz that were produced after their first depositions. (See Dkt. 1592 at 3:6-18 & n.1.) Like Uber, Waymo attempted to prioritize productions based on the deposition schedule, but, as Waymo fails to mention, its efforts were far less successful. Waymo repeatedly produced documents a day or two before key depositions, including those of Dmitri Dolgov, David Drummond, and John Krafcik. (Id. at 3:12-13.) Worse yet, Waymo produced more than 7,350 documents, one-third of its entire production, on the very last day of discovery. (Id. at 3:13-15.)

Fourth, Uber's discovery, and disclosure, that certain Ottomotto documents had not been searched as part of Uber's discovery efforts does not constitute discovery "misconduct." (OOP at 38.) As Uber disclosed previously, Uber learned during the course of expert deposition preparation that, in contrast to the general practice after the Ottomotto acquisition, certain documents had not been migrated to Uber. (Dkt. 1929 at 2:20-21.) As detailed in the four declarations Uber submitted to explain what happened (Dkts. 1893-4, 1912, 1913, 1916), the

2.1

¹⁰ Waymo cites Uber's purported failure to log a January 3, 2016 white-boarding session involving Levandowski and Mr. Kalanick as an example of Uber's violation of the Court's order. Uber has already addressed this. Mr. Kalanick and other Uber personnel (Mr. Holden) present at the meeting did not recall the meeting just from looking at a cover email referencing it and did not have calendar entries that could have been used to refresh their recollections. (Dkt. 1592 at 2:27-3:1.) Further, the notes from the meeting were not picked up by the parties' agreed-upon search parameters. Rather, "Waymo requested the notes at 10:07 p.m. on August 23, based on a link to the document in an email, . . . and Uber promptly produced them the next day." (*Id.* at 3:3-5.)

error was wholly inadvertent, and Uber moved swiftly to correct it. Crucially, apart from a
single, conclusory statement that the belated production of these documents "prejudiced
Waymo's overall investigation" (OOP at 38), Waymo identifies no prejudice suffered as a result
of this unfortunate error. In fact, the documents were not relevant to any of the eight alleged
rade secrets at issue in this litigation. Waymo's trial exhibit list includes only four largely
rrelevant exhibits from this belated production. (See Exhibit List No. 5879, 5880, 5881, 9079.)
And Waymo in its Offer of Proof only argues that a single document from this production is
relevant, i.e., Exhibit 5881. (OOP at 37.) The only alleged relevance of Exhibit 5881 (OOP Ex.
96) is Waymo's reliance on this document to support its theory that Mr. Ron knew about
Levandowski's role in the Tyto ownership structure. (OOP at 46, 46 n.27.) Even if true, that fact
has no bearing on Waymo's trade secret claims, and Waymo was not prejudiced by the timing of
ts production. Exhibit 5879 is nothing more than a notification that Levandowski received Mr.
Ron's "ATC visit summary" on April 18, 2016, and Exhibit 5880 similarly contains nothing of
substance in its summary of a meeting between Levandowski and Mr. Kalanick. Finally, any
alleged prejudice Waymo may have suffered due to the timing of production of Exhibit 7909 was
cured by Waymo's subsequent questioning of one of the relevant witnesses, Don Burnette, about
this document at his deposition. (Ex. 1 (Burnette 10/13/17 Dep. at 329:12-330:20).)

Finally, Waymo's complaints about the Shred Works receipts are not evidence of discovery misconduct. (OOP at 38-39.) The relevant receipts were promptly produced after Rhian Morgan, an Uber ATG employee and former head of HR for Ottomotto, found them while searching her home for documents needed to prepare her personal taxes. (Ex. 16 (Morgan 11/21/17 Dep. at 390:7-392:1).) For completeness, Uber also produced a non-responsive March 1, 2016 Shred Works receipt, which had been provided to MoFo in late April 2017 and about which Ms. Morgan testified on October 4, 2017. Uber immediately offered to produce Ms. Morgan for a further deposition. Although Waymo suggests that Uber limited the deposition

¹¹ Ms. Morgan's discovery of the receipts was truly unexpected to Uber's counsel. At her October 4, 2017 deposition, Ms. Morgan testified that she "[p]robably threw [the receipts] away." (Ex. 15 (Morgan 10/4/17 Dep. at 268:13-270:3).)

2.1

to 30 minutes (OOP at 39), in fact, Waymo demanded a full hour with Ms. Morgan, and Uber did not object. (*See* Ex. 51 (11/19/17 @ 8:32 PM email from Arturo Gonzalez).)

Waymo's claims of prejudice as a result of the Shred Works receipts ring hollow. Waymo argues that it was prevented from pursuing third party discovery regarding the authenticity of the receipts. But Waymo has no good-faith basis for questioning the authenticity of the receipts, because in the 30-minute deposition it took of Ms. Morgan, she authenticated them. *See* FRE 901(a), (b)(1); (Ex. 16. (Morgan 11/21/17 Dep. at 394:2-12, 399:9-19, 399:20-400:3, 404:18-405:2)).

C. Waymo Uncovered No Evidence that Resuscitates Its Meritless Spoliation Claims

The Court requested that Waymo be "very specific" in its Offer of Proof as to how (if at all) the Jacobs material "relates to other alleged concealment, spoliation, Tyto, due diligence, any of those other subjects." (Dkt. 2342, 12/4/17 Hr'g Tr. at 45:14-22.) Discovery into the Jacobs material has proven that there is no relation between the allegations in the Jacobs demand letter and Waymo's allegations of misconduct in this case. Despite having discovered no additional bases for spoliation or any new "truthful information" relevant to its already-briefed spoliation claims, Waymo has used what have proven to be meritless and irrelevant allegations from the Jacobs demand letter as an excuse to rehash this issue. (OOP at Section II(A).) Uber has briefed its responses to the allegations repeated in Section II.A of Waymo's Offer of Proof at Dkt. 2240-4, but will address Waymo's arguments again briefly here, particularly where Waymo appears to imply that the Jacobs material has somehow bolstered these unsubstantiated allegations.

1. There Is No Spoliation as a Result of Ephemeral Messaging

Huffing and puffing aside, Waymo never actually contends that it has discovered any evidence of ephemeral messaging usage that bears on its spoliation claims, nor could it. As detailed thoroughly above (*Supra* Section II.C), Waymo has long-known of Uber's use of ephemeral messaging. Waymo uncovered no evidence that ephemeral messages were used to discuss, much less intentionally conceal, any communications relevant to this case. Waymo newly takes issue with the chat programs uChat and HipChat, but fails to note that (1) these are

not ephemeral platforms, and (2) Waymo has known of Uber's use of these platforms since Uber served it August 14, 2017 Interrogatory Responses. (Ex. 55, 8/14/2017 Uber Response to Waymo Interrogatory No. 8 at 4 ("From 2014 to November 29, 2016, Uber retained [HipChat] rooms for seven days or seventy-five messages. After November 29, 2016, (prior to this case being filed), the [HipChat] retention setting was set to indefinite. On April 24, 2017, Uber rolled out uChat, a proprietary chat messaging application designed by Uber, to replace HipChat. Uber retains all uChat messages for personnel on legal hold during the hold, and otherwise retains all messages for seven days.") (Ex. 6 (Haimovici 30(b)(6) Dep. at 61:4-15; 63:8-15).) Finally, none of the Jacobs-related discovery has any bearing on the auto-delete setting on Mr. Kalanick's phone text messages, other than inspiring Waymo to characterize Mr. Kalanick's texts as "effectively" ephemeral. (OOP at 27:22-23.) Uber has already thoroughly addressed Waymo's claims regarding the auto-delete function at Dkt. 2240-4, 14:13-15:26.

2. There Was No Spoliation of the Five Hard Drives

Nor is there any new support for Waymo's claims based on the five Drobo 5D hard-drives. Rather, Waymo focuses on evidence produced in September that it could have included in its November motion for sanctions. One such exhibit, a Stroz Memorandum (OOP Ex. 62), is nothing more than inadmissible hearsay that purports to present what Mr. Kalanick and Mr. Poetzscher told Levandowski, as characterized by Levandowski in his statements to Stroz Friedberg, and as further characterized by Stroz Friedberg. *See* FRE 805 (each level of hearsay requires an admissible basis); *PixArt Imaging, Inc. v. Avago Tech. Gen. IP (Singapore) Pte. Ltd.*, No. C 10-00544 JW, 2011 WL 5417090, at *9 (N.D. Cal. Oct. 27, 2011) (proponent of evidence must show each level of hearsay admissible pursuant to an exception). This account has been disputed by every other meeting participant. Mr. Kalanick, Mr. Poetzscher, Ms. Qi, and Mr. Ron all testified that Mr. Kalanick told Levandowski not to bring the discs to Uber and/or to consult a lawyer. (*See* Dkt. 2094-6, Kalanick Dep. at 22:4-23:16; Dkt. 2096-10, Qi Dep. at 279:4-284:12; Dkt. 2096-11, Poetzscher Dep. at 253:3-256:7; Dkt. 2243-1, Ron Dep. at 30:5-15.) And as Uber has already detailed, there was no duty to preserve evidence at the time of the alleged spoliation (Dkt. 2240-4 at 6:3-12:4), and the evidence shows no intent to deprive Waymo of the use of the

hard drives in this litigation. (*Id.* at 13:15-14:12, 16:9-14.) Uber has also already responded to Waymo's allegations of untimeliness regarding its disclosure of information related to the five discs (Dkt. 806 at 5:22-25), and in any event Waymo does not claim prejudice, which of course it cannot given that it has known about these discs since June.

3. There Was No Spoliation of Evidence Regarding Ottomotto's Formation and Early Development

Here Waymo reiterates a smattering of its previous arguments without even attempting to imply that the Jacobs discovery has led to any information that would affect the merits of these claims. Uber's previous response makes clear that in each of these instances, there was no destruction of evidence done with the intent to deprive Waymo of its use in this litigation (Dkt. 2240-4 at 13:13-17:5), nor was there a duty to preserve evidence at the time of the alleged destruction. (*Id.* at 6:3-12:4.)

4. There Was No Spoliation of Levandowski's Non-Uber Laptops

Waymo has known about Levandowski's use of personal laptop computers since at least June 8, 2017, when Uber identified a personal Levandowski laptop in an interrogatory response. (Ex. 54, Uber's Responses to First Set of Expedited Interrogatories (No. 3).) In fact, Waymo moved on this very issue, and Judge Corley denied Waymo's motion. (Dkt. 682 at 5-6; Dkt. 881 at 2.) As an initial matter, this issue has nothing to do with spoliation—Waymo has not shown that any evidence was destroyed, as opposed to being unavailable due to Levandowski's Fifth Amendment invocation. After Levandowski exercised his Fifth Amendment right to not provide his computers to the parties for inspection, Levandowski's counsel agreed as a compromise to run certain search terms and provide any hits. Waymo does not dispute that Uber has no control over those computers, and is in no position to criticize Uber for Levandowski's failure to turn over his personal computers. Additionally, Rule 37 sanctions are inapplicable to information that is not in control of the party accused of spoliation (Fed. R. Civ. P. 37, 2015 Amendment Committee Notes on Subdivision (e)), and Uber does not and has never had control of these laptops.

5. There Was No Spoliation of Tyto Email Archives or Obstruction into Tyto Discovery

In sections II(A)(5) and II(E) of its brief, Waymo continues to take advantage of its Offer of Proof as an opportunity to cite additional evidence that was produced well before its November sanctions motion. This time, it does so to elaborate on its fantasy that Tyto was part of a convoluted, years-long conspiracy to pilfer trade secrets.

Regarding spoliation, Waymo's only actual claim remains that the Tyto acquisition was structured to intentionally destroy Tyto's email archives—an allegation that has already been thoroughly refuted. (Dkt. 2240-4 at 16:15-17:3.) In short, the Tyto email accounts were excluded from the purchase agreement because "it really wasn't part of what Ottomotto was interested in acquiring, which was primarily the engineering talent and maybe the Owl sensor," the Tyto email accounts "never really came up" during the negotiations, and Mr. Stojanovski "eventually closed down the [Tyto] e-mail accounts" after the asset purchase because Tyto "no longer was an ongoing concern with real business opportunities" and because he "didn't need to have access to Tyto LiDAR e-mail anymore, so there wasn't any sense in paying for ongoing e-mail hosting services." (Dkt. 2243-3.) Moreover, Mr. Stojanovski testified *in July* that he wasn't sure whether the emails were permanently destroyed. (*Id.*) It is difficult to reconcile Waymo's eleventh hour contention that these emails would have contained critical support for its allegation that Uber misappropriated trade secrets through Tyto on one hand, with its decision to forego the opportunity for basic follow-up on whether these emails could have been restored on the other.

As for Waymo's claims that Uber obstructed discovery into Tyto, the bottom line is that Tyto and the other entities Waymo lists are third parties over which Uber has no control. Waymo ignores Lior Ron and Ognen Stojanovski's testimony that they did not know whether Levandowski had an indirect ownership interest in Tyto. (Ex. 25 (Stojanovski Dep. at 33:16-18; 34:6-11.) Moreover, the "confidentiality issues" about which Waymo complains were issues Tyto raised that prevented Uber from determining aspects of Tyto's ownership structure, not information Uber was withholding for confidentiality reasons. (OOP Ex. 92 at 2: "The members and ultimate owners of Sandstone Group LLC were not disclosed to Ottomotto or Uber during the

1	transaction. In response to the issue you raised, we are trying to obtain details about Sandstone
2	Group LLC's ownership, but are running into confidentiality issues."; Rivera Decl. ¶ 17.)
3	Nonetheless, Uber worked diligently to respond to Waymo's interrogatories even though the
4	requested information concerned third parties over which Uber had no control. (OOP Ex. 92 at 2,
5	"We are continuing to make inquires, however, and will let you know if we ascertain the ultimate
6	owner(s) of Tyto LiDAR LLC.") In any event, Waymo ultimately received full information
7	about the ownership structure of Tyto from third parties; Waymo suffered no prejudice.
8	Moreover, the issue has no bearing on Waymo's trade secret claims. There is nothing
9	nefarious about the fact that both Uber and Ottomotto were interested in acquiring Tyto for its
10	engineering talent, and discussed doing so. In fact, Google
11	(Ex. 3, (Cooper Dep. at 39:16-45:2).) And
12	none of the cited communications about the acquisition imply a desire for secrecy or destruction
13	of evidence, or indicate that additional conversations relevant to this case took place. Waymo
14	simply has no evidence to corroborate its speculation that there are any relevant, "[i]mportant
15	communications between Levandowksi, James Haslim, [Travis] Kalanick, and others involved in
16	Tyto's LiDAR work and/or acquisition" that were "destroyed, "withheld," or are "missing."
17	(OOP at 32:26-33:1.) Moreover, if there had been any Tyto emails with Mr. Kalanick at his Uber
18	email, those exchanges would be on Uber's email system and would be retained.
19	Finally, nothing about the discovery process as it relates to Tyto hindered Waymo's
20	ability to conduct discovery into whether alleged trade secret misappropriation occurred. The
21	only allegation Waymo makes in regards to Tyto that has any potential relevance to its claims in
22	this case is that Levandowski "instructed Haslim regarding the details of LiDAR technology that
23	Waymo claims as Trade Secret No. 90." (OOP at 47:11-13.) Waymo was in no way obstructed
24	from obtaining discovery from Mr. Haslim on this issue—which is unrelated to Tyto's ownership
25	structure—as evidenced by Waymo's own summary of this evidence. (OOP at 45:11-28.)
26	VIII. WAYMO'S EVIDENCE AND ARGUMENTS REGARDING UBER'S
27	ARE IRRELEVANT AND INADMISSIBLE

Venturing even further afield from the trade secrets at issue, Waymo seeks to bring

Waymo's conclusion that is relevant because it "raises serious concerns regarding its preservation of relevant data in this case" is nothing more than speculation and hearsay based solely on Such evidence is irrelevant and inadmissible, and the Court should not allow such a sideshow. See Aniplex, Inc. v. Upper Deck Co, No. 2:08-CV-00442-HDM-PAL, 2011 WL 3889566, at *2 (D. Nev. Sept. 2, 2011) ("Demand letters constitute inadmissible hearsay."). CONCLUSION There is no "truthful information" relevant to this case in the Jacobs documents that was not already known by Waymo. The few specific allegations that touched upon Waymo or Uber's ATG turned out to be nothing but smoke, created by a lawyer who was seeking to justify the exorbitant dollar figure he demanded from Uber. For Uber to get a fair trial, it is critical that the Court continue to exclude all of the irrelevant, scandalous allegations that have been thrown Uber's way. The issues relating to the Jacobs allegations have been a distraction, and it is time for the parties and the Court to focus on the issues the jury will decide: whether Waymo's alleged trade secrets are actually trade secrets, whether Uber has misappropriated them, and if so, whether there are any damages. We urge the Court to allow the parties to try those issues without the fog of the Jacobs documents. Dated: January 19, 2018 MORRISON & FOERSTER LLP /s/ Arturo J. Gonzalez ARTURO J.
